Postharvest Technology of Perishable Horticultural Commodities Elhadi M. Yahia, 2019-07-16 Postharvest Technology of Perishable Horticultural Commodities describes all the postharvest techniques and technologies available to handle perishable horticultural food commodities. It includes basic concepts and important new advances in the subject. Adopting a thematic style, chapters are organized by type of treatment, with sections devoted to postharvest risk factors and their amelioration. Written by experts from around the world, the book provides core insights into identifying and utilizing appropriate postharvest options for maximum results. Presents the most recent developments in processing technologies in a single volume. Includes a wide range of perishable products, thus allowing for translational insight. Appropriate for students and professionals. Written by experts as a reference resource. Electronic Irradiation of Foods R. B. Miller, 2006-12-26 Food irradiation: the use of ionizing radiation to destroy harmful biological organisms in food is a safe, proven process that has many useful applications. It has been endorsed by numerous health organizations and has now been approved for many applications by governments around the world. Electronic Irradiation of Foods describes all the key aspects of electron accelerator technology in detail. It emphasizes the physical science and technology aspects of food irradiation using machine sources of ionizing radiation. The book provides significant technical depth for interested workers and presents descriptive introductory material that should help demystify technology for businessmen to make informed choices regarding important investment decisions. Introductory chapters summarize the effects of ionizing radiation on biological organisms and the organic compounds comprising foods and give an overview of the food irradiation process. Subsequent chapters cover the details of the electron beam and x-ray energy deposition, electron accelerator technologies, beam scanning systems, material handling systems, shielding design, and process control considerations. Important appendices cover radiation dosimetry, induced radioactivity, and ozone generation.
