Biological Flows Colin G. Caro, M.Y. Jaffrin, 2013-12-19 Biomechanics has a distinguished history extending at least to the 16th Century However the later half of this century has seen an explosion of the field with it being viewed as offering exciting challenges for physical scientists and engineers interested in the life sciences and wonderful opportunities for life scientists eager to collaborate with physical scientists and engineers and to render their scientific work more fundamental That the field is now well established and expanding is demonstrated by the formation of a World Committee for Biomechanics and the success and large participation in the 1st and 2nd World Congresses of Biomechanics held respectively in San Diego in 1990 and in Amsterdam in 1994 With more than 1350 scientific papers delivered at the 2nd World Congress either within symposia or oral or poster sessions it would have been out of the question to try to produce comprehensive edited proceedings Moreover we are confident that most of the papers have been or will be published in one of the excellent journals covering the field But of effort contributed by the plenary lecturers and the tutorial we thought that the large amount and keynote speakers of various symposia deserved to be recognised in the form of a specific publication thus also allowing those unable to attend the presentations to catch up in the findings Furthermore we feel that there is now a need to review aspects of the field
