Encountering Religious Pluralism Harold Netland, 2001-08-14 Harold Netland traces the emergence of the pluralistic ethos that challenges Christian faith and mission interacting heavily with philosopher John Hick and providing a framework for developing a comprehensive evangelical theology of religions *Evil and Pain* Joseph B. Onyango Okello, 2017-06-15 A specific form of understanding of evil in the problem of evil debate gets assumed among a variety of materialistic naturalists Owing to their physicalist and in some cases behaviorist philosophies this understanding assumes a hedonistic view of pain that reduces valuation to pleasure and pain Herein all forms of good and evil get reduced to pleasure and pain This work reorients the debate toward a more biblical understanding of evil based on an essentialist reading of ethics The book argues that the hedonistic understanding of value characterizing prominent naturalistic materialists such as those alluded to by J L

Mackie semantically seems to entail either a synonymous or a near synonymous relationship between evil and pain. The book further argues that this understanding given the essentialist reading of ethics seems wrongheaded. By reorienting the contours of the debate it suggests that the problem of pain might in effect be quite different from the problem of evil and that neither problem necessarily entails the other. Seen in this way neither problem casts doubt on belief in God's existence.

**Routledge Companion to Philosophy of Religion** Chad Meister, Paul Copan, 2010-02-25 The Routledge Companion to Philosophy of Religion is an indispensable guide and reference source to the major themes, movements, debates, and topics in philosophy of religion. A team of renowned international contributors provide sixty-five accessible entries organized into nine clear parts: philosophical issues in world religions; key figures in philosophy of religion; religious diversity; the theistic conception of God; arguments for the existence of God; arguments against the existence of God; philosophical theology; Christian theism; recent topics in philosophy of religion. Covering key world religions including Hinduism, Buddhism, and Islam, and key figures such as Augustine, Aquinas, and Kierkegaard, the book explores the central topics in theism such as the ontological, cosmological, and teleological arguments for God's existence. Three final parts consider Catholicism, Protestantism, Eastern orthodoxy, and current debates including phenomenology, reformed epistemology, religious experience, and religion and science. This is essential reading for anyone interested in philosophy, religion, and related disciplines.

**God, Reason, and Theistic Proofs** Stephen T. Davis, 1997 Wisely structured and clearly written, *God, Reason, and Theistic Proofs* will make an excellent resource for those looking for an introduction to the debate surrounding the existence of God, or for those seeking intellectual validation for their faith.

**Divination and the Shamanic Story** Michael Berman, 2009-03-26 Stories have traditionally been classified as epics, myths, sagas, legends, folk tales, fairy tales, parables, or fables. However, the definitions of the terms have a tendency to overlap, making it difficult to classify and categorize material. For this reason, a case can be made for the introduction of a new genre termed the shamanic story: a story that has either been based on or inspired by a shamanic journey, a numinous experience in non-ordinary reality, or one that contains a number of the elements typical of such a journey. Other characteristics include the way in which the stories all tend to contain embedded texts, often the account of the shamanic journey itself; how the number of actors is clearly limited, as one would expect in subjective accounts of what can be regarded as inner journeys; and how the stories tend to be used for healing purposes. Within this new genre, it is proposed that there exists a sub-genre, shamanic stories that deal specifically with divination, and examples are presented and analysed to support this hypothesis. By means of textual analysis, it can be shown they all share certain attributes in common, the identification of which forms the conclusion of the work.
