

Photo Articulation Test, Third Edition (PAT-3)

Publisher/Date:

- PRO-ED, Inc., 8700 Shoal Creek Blvd., Austin, TX 78758-6897. Published, 1997.

Purpose:

- Individually-administered articulation inventory for children 3-8 years of age.

Provides:

- Measurement of articulation through naming pictures and repeating stimulus words. Voice quality, language use, fluency, and intelligibility are assessed through the test's final items which require the child to verbalize a "story" around stimulus pictures.

Standardization Issues:

- The test's norms were based on 800 children from 24 states, and included children identified with speech-language disabilities. Purportedly, the demographics for the norm sample closely matched US demographics for that time period.

Reliability and Validity Issues:

- Internal consistency estimates for each age-level yielded acceptable reliability results. Examples of content-, criterion-, concurrent-, and construct-validity evidence are cited in the manual and appear sufficient to support its use as an articulation inventory.

Additional Points:

- The authors' statistical analysis for item bias on the basis of gender, race (White/Non-White), and ethnicity (Hispanic/Non-Hispanic) suggested no evidence of bias.
- No data on interrater reliability is reported, however, interscorer reliability (based on 2 scorers independently scoring 20 already-completed protocols) showed a high degree of scoring consistency.
- The test does not provide any specific framework for remedial activities, which lies in the hands of skilled clinicians to develop.
- Item discrimination analysis of the total (standardization) sample suggested that most children made less than 10% errors, suggesting that the test may not be especially sensitive to discriminating variable-degrees of development.
- The test is not normed for dialectical speakers, so care must be taken in interpreting results from children whose language contains natural

universalist view that acquisition of phonology is guided by universal principles has been the dominant position for decades More recently an alternative view has brought into focus the relationship between developmental markedness and language specific input frequencies With entirely original chapters on non ambient like productions by typically and atypically developing children and second language learners Unusual Productions in Phonology delves deeply into these competing explanations to show that patterns observed do not uniquely lend themselves to one or the other explanations Rather they point towards the need for both universal markedness and statistical input considerations in any attempted explanation Containing contributions from leading researchers from around the world this impressive collection is a must have resource for any researcher practitioner or advanced student specializing in phonology cognitive psychology applied linguistics and communication disorders *Rutter's Child and Adolescent Psychiatry* Anita Thapar, Daniel S. Pine, James F.

Leckman, Stephen Scott, Margaret J. Snowling, Eric A. Taylor, 2015-06-15 Rutter's Child and Adolescent Psychiatry is the leading textbook in its field. Both interdisciplinary and international, it provides a coherent appraisal of the current state of the field to help researchers, trainees, and practicing clinicians in their daily work. Integrating science and clinical practice, it is a comprehensive reference for all aspects of child and adolescent psychiatry. New to this full color edition are expanded coverage on classification including the newly revised Diagnostic and Statistical Manual of Mental Disorders DSM 5 and new chapters on systems neuroscience, relationship based treatments, resilience, global psychiatry, and infant mental health. From an international team of expert editors and contributors, this sixth edition is essential reading for all professionals working and learning in the fields of child and adolescent mental health and developmental psychopathology, as well as for clinicians working in primary care and pediatric settings. Michael Rutter has contributed a number of new chapters and a Foreword for this edition. I greatly welcome this new edition as providing both a continuity with the past and a substantial new look. Professor Sir Michael Rutter, extract from Foreword. Reviews of previous editions: This book is by far the best textbook of Child Adolescent Psychiatry written to date. Dr Judith Rapoport, NIH. The editors and the authors are to be congratulated for providing us with such a high standard for a textbook on modern child psychiatry. I strongly recommend this book to every child psychiatrist who wants a reliable up to date comprehensive, informative, and very useful textbook. To my mind, this is the best book of its kind available today. Journal of Child Psychology and Psychiatry.
