## Merge Portions of Multiple Photos

When you're photographing groups of people (with pets, especially), the burst mode on your camera can be your best friend. Capturing several shots guarantees that everyone is looking good in some of them. The trick is combining these into one perfect portrait.

Photomerge Group Shot lets you combine areas of multiple photos into one nearly seamless composition with just a few swipes of your cursor.

### To merge portions of multiple photos:

1. Open two or more similar photos in the Editor.
2. Switch to Guided mode, and click the Photomerge heading.
3. Click Photomerge Group Shot.  
The first image appears in the Source pane on the left, with an empty Final pane on the right.
4. Select the photos you want to use in the Photo Bin.
5. Drag one of the images to the Final pane (shown in 4a). This image is the end result, so it should have the fewest imperfections (such as people's heads turned away from the camera, motion blur, or other issues).
6. Click to select a photo in the Photo Bin that contains an element (a better facial expression, for example) you want merged into the Final pane. The photo appears in the Source pane (shown in 4a).

**FIGURE 10-43** Drag the photo you want to use as a base into the Final pane. In this case, the expressions of the man and the girl look best in the first image, so I'm building on that one.

**FIGURE 10-44** The second image includes the woman's best smile, so I clicked it in the Photo Bin to load it into the Source pane at left. Colored handles help you track which photo is which.
