Orzel, 2014-12-09 When it comes to science too often people say I just don't have the brains for it and leave it at that Why is science so intimidating and why do people let themselves feel this way What makes one person a scientist and another disinclined even to learn how to read graphs The idea that scientists are people who wear lab coats and are somehow smarter than the rest of us is a common yet dangerous misconception that puts science on an intimidating pedestal How did science become so divorced from everyday experience In *Eureka* science popularizer Chad Orzel argues that even the people who are most forthright about hating science are doing science often without even knowing it Orzel shows that science is central to the human experience every human can think like a scientist and regularly does so in the course of everyday

activities The common misconception is that science is a body of boring abstract often mathematical facts In truth science is a process Looking at the world Thinking about what makes it work Testing your mental model by comparing it to reality and Telling others about your results all things that people do daily By revealing the connection between the everyday activities that people do solving crossword puzzles playing sports or even watching mystery shows on television and the processes used to make great scientific discoveries Eureka shows that this process is one everybody uses regularly and something that anyone can do *Rethinking Communication Geographies* Jansson, André, 2022-05-17 This timely research handbook offers a systematic and comprehensive examination of the election laws of democratic nations Through a study of a range of different regimes of election law it illuminates the disparate choices that societies have made concerning the benefits they wish their democratic institutions to provide the means by which such benefits are to be delivered and the underlying values commitments and conceptions of democratic self rule that inform these choices Crisis of Conscience Tom

Mueller, 2019-10-01 A call to arms and to action for anyone with a conscience anyone alarmed about the decline of our democracy New York Times bestselling author Wendell Potter Powerful His extensively reported tales of individual whistleblowers and their often cruel fates are compelling They reveal what it can mean to live in an age of fraud The Washington Post Tom Mueller s authoritative and timely book reveals what drives a few brave souls to expose and denounce specific cases of corruption He describes the structural decay that plagues many of our most powerful institutions putting democracy itself in danger George Soros A David and Goliath story for our times the riveting account of the heroes who are fighting a rising tide of wrongdoing by the powerful and showing us the path forward We live in a period of sweeping corruption and a golden age of whistleblowing Over the past few decades principled insiders who expose wrongdoing have gained unprecedented legal and social stature emerging as the government s best weapon against corporate misconduct and the citizenry s best defense against government gone bad Whistleblowers force us to confront fundamental questions about the balance between free speech and state secrecy and between individual morality and corporate power In Crisis of Conscience Tom Mueller traces the rise of whistleblowing through a series of riveting cases drawn from the worlds of healthcare and other businesses Wall Street and Washington Drawing on in depth interviews with more than two hundred whistleblowers and the trailblazing lawyers who arm them for battle plus politicians intelligence analysts government watchdogs cognitive scientists and other experts Mueller anatomizes what inspires some to speak out while the rest of us become complicit in our silence Whistleblowers we come to see are the freethinking outspoken citizens for whom our republic was conceived And they are the models we must emulate if our democracy is to survive **Geological Carbon**
