Ambient intelligence is the vision of a technology that will become invisibly embedded in our natural surroundings present whenever we need it enabled by simple and effortless interactions attuned to all our senses adaptive to users and context

sensitive and autonomous High quality information access and personalized content must be available to everybody

anywhere and at any time This book addresses ambient intelligence used to support human contacts and accompany an

individual s path through the complicated modern world From the technical standpoint distributed electronic intelligence is addressed as hardware vanishing into the background Devices used for ambient intelligence are small low power low weight

and very importantly low cost they collaborate or interact with each other and they are redundant and error tolerant This means that the failure of one device will not cause failure of the whole system Since wired connections often do not exist

radio methods will play an important role for data transfer This book addresses various aspects of ambient intelligence from applications that are imminent since they use essentially existing technologies to ambitious ideas whose realization is still far

away due to major unsolved technical challenges **HWM** ,2005-01 Singapore s leading tech magazine gives its readers the power to decide with its informative articles and in depth reviews **PC Mag** ,1998-05-26 PCMag com is a leading authority
