Design and Agency John Potvin, Marie-Ève Marchand, 2020-05-14. *Design and Agency* brings together leading international design scholars and practitioners to address the concept of agency in relation to objects, organisations, and people. The authors set out to expand the scope of design history and practice, avoiding the heroic narratives of a typical modernist approach. They consider both how the agents of design construct and express their identities and subjectivities through practice, while also investigating the distinctive contribution of design in the construction of individual identity and subjectivity. Individual chapters explore notions of agency in a range of design disciplines and historical periods, including the agency of women in effecting changes to the design of offices and working practices, the role of Jeffrey Lindsay and Buckminster Fuller in developing the design of a geodesic dome, Le Corbusier's Casa Curutchet, a re-consideration of the gendered historiography of the Jugendstil movement, and Bruce Mau's design exhibitions. Taken together, the essays in *Design and Agency* provide a much-needed response to the traditional texts which dominate design history. With a broad chronological span from 1900 to the present and an equally broad understanding of the term design, it expands how we view the discipline and shows how design itself can be an agent for social, cultural, and economic change.
