

My Philosophy In Life

I was raised by my parents to be a good woman who tries to be always kind and helpful for the other people and live in harmony with commandments of my religion. The next thing about my philosophy of life is a proper attitude what means that I have a lot of faith in myself and I am taking challenges with believing in final success. Optimism is very important in woman's life and we cannot forget about it, because it helps in bearing up with difficulties. Having friends is also important; however, the point is to choose wisely and surround yourself with well-wishing and loyal people which won't stab you in the back when you will need help.

My philosophy of life tells that I always have to be myself and listen to my heart as much as I listen to my mind and to play along with the voice of my conscience. I believe, that woman should develop herself, every time try to experience something new and always use an opportunity to increase her knowledge in order to be conscious and intelligent. Summing up, I am convinced that the best way to achieve happiness is to be loyal to your family and friends' woman who has optimistic view on future, as my philosophy of life says.
