 - i. 4 major things happen in the Light Reaction.
 1. Chlorophyll captures light energy
 2. Water is split. The H is used to make NADPH and oxygen- O_2 is made
 3. ATP and NADPH are made (these are needed for the dark reaction.)
 - These are energy carrying molecules
 - $\text{ATP} \rightarrow \text{ADP} + \text{P} + \text{Energy}$
 - $\text{NADPH} \rightarrow \text{NADP} + \text{H} + \text{Energy}$
 4. Oxygen is released into the air (Thank You Plants)
 - b. **Part 2: The Dark Reaction** is called the dark reaction because it can work without light. It is also called the **Calvin Cycle** because Melvin Calvin figured out how it works.
 - i. It uses the **ATP** and **NADPH** from the light reaction and carbon dioxide in air CO_2 from the air to make Glucose $\text{C}_6\text{H}_{12}\text{O}_6$.
See page 205 in your book.
 - ii. remember most of the mass from a plant comes from the air, CO_2

using argument driven inquiry for high school lab instruction but just aren't sure how to do it. You aren't alone. This book will provide you with both the information and instructional materials you need to start using this method right away. **Argument Driven Inquiry in Biology** is a one-stop source of expertise, advice, and investigations. The book is broken into two basic parts: 1. An introduction to the stages of argument driven inquiry from question identification, data analysis, and argument development and evaluation to double-blind peer review and report revision. 2. A well-organized series of 27 field-tested labs that cover molecules and organisms, ecosystems, heredity, and biological evolution. The investigations are designed to be more authentic scientific experiences than traditional laboratory activities. They give your students an opportunity to design their own methods, develop models, collect and analyze data, generate arguments, and critique claims and evidence. Because the authors are veteran teachers, they designed **Argument Driven Inquiry in Biology** to be easy to use and aligned with today's standards. The labs include reproducible student pages and teacher notes. The investigations will help your students learn the core ideas, crosscutting concepts, and scientific practices found in the Next Generation Science Standards. In addition, they offer ways for students to develop the disciplinary skills outlined in the Common Core State Standards. Many of today's teachers like you want to find new ways to engage students in scientific practices and help students learn more from lab activities. **Argument Driven Inquiry in Biology** does all of this even as it gives students the chance to practice reading, writing, speaking, and using math in the context of science. *Student Study Guide for Campbell's Biology Second Edition* Martha R.
