55 Ways to the Wilderness in Southcentral Alaska, 5th Ed., An indispensable resource for hiking skiing paddling and climbing the backcountry of Southcentral Alaska

An Eye at the Top of the World Pete Takeda, 2009-04-13 At some point during the inhumanly cold Himalayan winter straddling 1965 and 1966 a peculiar collection of box shaped objects one sprouting a six foot insect like antenna plummets nine thousand feet down the sheer flanks of a remote peak Ripped from its moorings by an avalanche the jumbled apparatus slides down a funnel shaped hourglass of hard snow and shoots over a black cliff band careening a vertical distance six times the

height of the Empire State building The boxes come to rest on the glacier at the mountain's base One an olive drab casing the size of a personal computer begins to sink Then trailing a robotic dogtail of torn wires it slowly burns through the snow melting into solid blue glacial ice eventually disappearing beneath the surface and never seen again No one actually witnessed this event But as you read these words nearly four pounds of plutonium locked in the glacier's dark unknowable heart are almost certainly moving ever closer to the source of the Ganges River Eye at the Top of the World provides a harrowing present day account of Takeda's expedition to solve the mystery of Nanda Devi
