Transformed States Martin Halliwell, 2024-11-15. *Transformed States* offers a timely history of the politics, ethics, medical applications, and cultural representations of the biotechnological revolution from the Human Genome Project to the COVID-19 pandemic. In exploring the entanglements of mental and physical health in an age of biotechnology, it views the post-Cold War 1990s as the horizon for understanding the intersection of technoscience and culture in the early twenty-first century. The book draws on original research spanning the presidencies of George H. W. Bush and Joe Biden to show how the politics of science and technology shape the medical uses of biotechnology. Some of these technologies reveal fierce ideological conflicts in the arenas of cloning, reproduction, artificial intelligence, longevity, gender affirmation, vaccination, and environmental health. Interweaving politics and culture, the book illustrates how these health issues are reflected in and challenged by literary and cinematic texts from Oryx and Crake to Annihilation and from Gattaca to Avatar. By assessing the complex relationship between federal politics and the biomedical industry, *Transformed States* develops an ecological approach to public health that moves beyond tensions between state governance and private enterprise. To that end, Martin Halliwell analyzes thirty years that radically transformed American science, medicine, and policy, positioning biotechnology in dialogue with fears and fantasies about an emerging future in which health is ever more contested. Along with the two earlier books, *Therapeutic Revolutions* (2013) and *Voices of Mental Health* (2017), *Transformed States* is the final volume of a landmark cultural and intellectual history of mental health in the United States, journeying from the combat zones of World War II to the global emergency of COVID-19.

The Routledge Handbook of Vegan Studies Laura Wright, 2021-03-30. This wide-ranging volume explores the tension between the dietary practice of veganism and the manifestation, construction, and representation of a vegan identity in today's society. Emerging in the early 21st century, vegan studies is distinct from more familiar conceptions of animal studies, an umbrella term for a three-pronged field that gained prominence in the late 1990s and early 2000s, consisting of critical animal studies, human animal studies, and posthumanism. While veganism is a consideration of these modes of inquiry, it is a decidedly different entity, an ethical delineator that for many scholars marks a complicated boundary between theoretical pursuit and lived experience. *The Routledge Handbook of Vegan Studies* is the must-have reference for the important topics, problems, and key debates in the subject area and is the first of its kind. Comprising over 30 chapters by a team of international contributors, this handbook is divided into five parts: History of vegan studies; Vegan studies in the disciplines; Theoretical intersections; Contemporary media entanglements; Veganism around the world. These sections contextualize veganism beyond its status as a dietary choice, situating veganism within broader social, ethical, legal, theoretical, and artistic discourses. This book will be

essential reading for students and researchers of vegan studies animal studies and environmental ethics Ethical Futures and Global Science Fiction Zachary Kendal, Aisling Smith, Giulia Champion, Andrew Milner, 2020-01-27 Ethical Futures and Global Science Fiction explores the ethical concerns and dimensions of representations of the future of global science fiction focusing on the issues that dominate utopian dystopian and science fiction literature The essays examine recent visions of the future in science fiction and re examine earlier texts through contemporary lenses Across fourteen chapters the collection considers authors from Algeria Australia Canada China Egypt France Germany Haiti India Jamaica Macedonia Mexico Russia South Africa the UK and USA The volume delves into a range of ethical questions of immediate contemporary relevance including environmental ethics postcolonial ethics social justice animal ethics and the ethics of alterity
