Douglas S. Reed

Social Science Grade 9 November 2014 Memorandum:

Building the Federal Schoolhouse Douglas S. Reed, 2014-05-29 Over the past fifty years the federal government's efforts to reform American public education have transformed U S schools from locally run enterprises into complex systems jointly constructed by federal state and local actors The construction of this federal schoolhouse an educational system with common national expectations and practices has fundamentally altered both education politics and the norms governing educational policy at the local level Building the Federal Schoolhouse examines these issues through an in depth fifty year examination of federal educational policies in the community of Alexandria Virginia a wealthy yet socially diverse suburb of Washington D C The epochal social transformations that swept through America in the past half century hit Alexandria with particular force transforming its Jim Crow school system into a new immigrant gateway district within two generations Along the way the school system has struggled to provide quality education for special needs students and has sought to overcome the legacies of tracking and segregated learning while simultaneously retaining upper middle class students Most recently it has grappled with state and federally imposed accountability measures that seek to boost educational outcomes All of these policy initiatives have contended with the existing political regime within Alexandria at times forcing it to a breaking point and at other times reconstructing it All the while the local expectations and governing realities of administrators parents politicians and voters have sharply constrained federal initiatives limiting their scope when in conflict with local commitments and amplifying them when they align Through an extensive use of local archives contemporary accounts school data and interviews Douglas S Reed not only paints an intimate portrait of the conflicts that the federal schoolhouse's creation has wrought in Alexandria but also documents the successes of the federal commitment to greater educational opportunity In so doing he highlights the complexity of the American education state and the centrality of local regimes and local historical context to federal educational reform efforts

The Meritocracy Trap Daniel Markovits, 2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems

directly from meritocracy's successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When The Meritocracy Trap reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people

Failing Our Future Joshua R. Eyler, 2024-08-27 An indictment of the grading system in American schools and colleges and a blueprint for how we can change it One of the most urgent and long standing issues in the US education system is its obsession with grades In *Failing Our Future* Joshua R Eyler shines a spotlight on how grades inhibit learning cause problems between parents and children amplify inequities and contribute to the youth mental health crisis Eyler who runs the Center for Excellence in Teaching and Learning at the University of Mississippi illustrates how grades interfere with students intrinsic motivation and perpetuate the idea that school is a place for competition rather than discovery Grades force students to focus on rewards and distract them from exploring ideas or pursuing interests beyond what they'll be tested on In fact grades significantly impede the learning process They are also significantly affecting children's physical emotional and psychological well being Rates of anxiety depression and suicidal ideation have spiked and academic stress tied to grades is a leading cause of this escalation Eyler shares success stories of grading reform efforts that are already under way as an antidote to the harms caused by the practices currently used in educational institutions Equal parts scathing and hopeful *Failing Our Future* aims to improve the lives of students by encouraging them to define success on their own terms Parents educators policymakers and students will find in these pages a rallying cry for change and a blueprint for how to implement reforms in our homes and classrooms

Tobach, 2014-05-22 First published in 1984 In this collection of essays Schneirla is identified as a scientist and citizen unafraid to hold and present unpopular ideas Schneirla had always been opposed to the hereditarian views that allowed for the politicalization of psychology and spoke out early against the idea of the genetic basis of behavior It is fitting that his ideas which still form the nexus of the major theoretical criticism of classical
