*Digital Sociology* Deborah Lupton, 2014-11-05 We now live in a digital society. New digital technologies have had a profound influence on everyday life: social relations, government, commerce, the economy, and the production and dissemination of knowledge. People's movements in space, their purchasing habits, and their online communication with others are now monitored in detail by digital technologies. We are increasingly becoming digital data subjects, whether we like it or not, and whether we choose this or not. The sub-discipline of digital sociology provides a means by which the impact, development, and use of these technologies and their incorporation into social worlds, social institutions, and concepts of selfhood and embodiment may be investigated, analysed, and understood. This book introduces a range of interesting social, cultural, and political dimensions of digital society and discusses some of the important debates occurring in research and scholarship on these aspects. It covers the new knowledge economy and big data, reconceptualising research in the digital era, the digitisation of higher education, the diversity of digital use, digital politics, and citizen digital engagement, the politics of surveillance, privacy issues, the contribution of digital devices to embodiment and concepts of selfhood, and many other topics. *Digital Sociology* is essential reading, not only for students and academics in sociology, anthropology, media and communication, digital cultures, digital humanities, internet studies, science and technology studies, cultural geography, and social computing, but for other readers interested in the social impact of digital technologies.

*Labour and Social Transformation in Central and Eastern Europe* Violaine Delteil, Vassil Nikolaev Kirov, 2016-07-22 Over a quarter of a century after the fall of the Berlin Wall and 10 years after their accession to the European Union (EU), Central and Eastern European Countries (CEECs) still show marked differences with the rest of Europe in the fields of labour, work, and industrial relations. This book presents a detailed and original analysis of labour and social transformations in the CEECs. By examining a wide range of countries in Central Europe, *Labour and Social Transformation in Central and Eastern Europe* offers a comprehensive and contrasting view of labour developments in Central and Eastern Europe. Chapters explore three related issues. The first deals with the understanding of the complex process of Europeanization applied in the sphere of labour, employment, and industrial relations. The second issue refers to the attempt to link the Europeanization approach with an analysis mobilizing the theoretical concept of dependent capitalism. The third issue refers to the cumulative trends of labour weakening and labour awakening that has emerged in particular in the aftermath of the crisis beginning in 2007-2008. This book will be of interest to academics, policy makers, and stakeholders at European and national level in the EU member states.
