Sociology Of Education:

Education and Society Thurston Domina, Benjamin G. Gibbs, Lisa Nunn, Andrew Penner, 2019-08-20 Drawing on current scholarship *Education and Society* takes students on a journey through the many roles that education plays in contemporary societies Addressing students own experience of education before expanding to larger sociological conversations *Education and Society* helps readers understand and engage with such topics as peer groups gender and identity social class the racialization of achievement the treatment of immigrant children special education school choice accountability discipline global perspectives and schooling as a social institution The book prompts students to evaluate how schools organize our society and how society organizes our schools Moving from students to schooling to social forces *Education and Society* provides a lively and engaging introduction to theory and research and will serve as a cornerstone for courses such as sociology of education foundations of education critical issues in education and school and society *The Middling Sorts* Maureen T. Hallinan, 2000-04-30 The aim of the *Handbook of Sociology of Education* is to present the most theoretically grounded and empirically rigorous sociological analyses of schools to date The authors are distinguished researchers in the field Their contributions to the *Handbook* offer major theoretical perspectives on the schooling process and describe significant empirical studies of schools and their effects on individuals and society The research presented in the *Handbook* is built on three fundamental tenets of sociology First the authors adopt the perspective that schools are a central institution in society An understanding of the function of schooling in social life is enhanced by viewing schools as interrelated with other societal institutions The study of how the context of schooling influences education processes is critical to an understanding of school outcomes Rather than being determined solely by ascribed and achieved characteristics an individual's cognitive and social development are influenced heavily by the structures and networks in which the individual is embedded Communities families schools and social groups are critical elements in the educative process By viewing the school as a societal institution and highlighting the interaction between context and individual behavior the *Handbook* chapters provide a broader and deeper understanding of the determinants of learning in contemporary society The second sociological insight that guides the research in the *Handbook* is that the school is a social system **The Sociology of Education** Olive Banks, 1969 **The Structure of Schooling** Richard Arum, Irene R. Beattie, Karly Ford, 2014-11-13 *The Structure of Schooling* Readings in the Sociology of Education by Richard Arum Irene Beattie and Karly Ford exposes students to examples of sociological research on schools with a focus on the school as community Now in its Third Edition this engaging reader has broadened its scope even more presenting additional readings in particular related to the sociology of higher education The book draws from classic and contemporary scholarship to examine current issues and diverse theoretical approaches to studying the effects of schooling on individuals and society In addition to covering traditional areas such as stratification and racial inequality the book also veers off the beaten path including readings on such contemporary

topics as bullying school shootings school choice and teen social media use
