

The background of the cover is a dark, textured collage. It features several human limbs, including arms and hands, some of which are pale and appear to be floating or reaching out. There are also faces, some of which are partially obscured or integrated into the overall composition. The scene is set in a dark, watery environment, with numerous small, bright orange petals or leaves floating around. A green ribbon or string is also visible, looping through the upper part of the image. The overall effect is surreal and evocative, suggesting themes of social interaction and psychology.

Bowman,2025 The second edition of the Oxford Handbook of Media Psychology explores facets of human behavior thoughts and feelings experienced in the context of media use and creation The volume spans foundational theories and methodological approaches presenting cutting edge research and offering an exploration of how technology impinges upon human psychology Key ideas include social media identity and self concept parasocial relationships fandom gaming and interactive media social representation mental health and media and AI The authors are widely regarded as top experts in the field Socializing States Ryan Goodman,Derek Jinks,2013-09-11 The role of international law in global politics is as poorly understood as it is important But how can the international legal regime encourage states to respect human rights Given that international law lacks a centralized enforcement mechanism it is not obvious how this law matters at all and how it might change the behavior or preferences of state actors In *Socializing States* Ryan Goodman and Derek Jinks contend that what is needed is a greater emphasis on the mechanisms of law s social influence and the micro processes that drive each mechanism Such an emphasis would make clearer the micro foundations of international law This book argues for a greater specification and a more comprehensive inventory of how international law influences relevant actors to improve human rights conditions Substantial empirical evidence suggests three conceptually distinct mechanisms whereby states and institutions might influence the behavior of other states material inducement persuasion and what Goodman and Jinks call acculturation The latter includes social and cognitive forces such as mimicry status maximization prestige and identification The book argues that 1 acculturation is a conceptually distinct empirically documented social process through which state behavior is influenced and 2 acculturation based approaches might occasion a rethinking of fundamental regime design problems in human rights law This exercise not only allows for reexamination of policy debates in human rights law it also provides a conceptual framework for assessing the costs and benefits of various design principles While acculturation is not necessarily the most important or most desirable approach to promoting human rights a better understanding of all three mechanisms is a necessary first step in the development of an integrated theory of international law s influence *Socializing States* provides the critical framework to improve our understanding of how norms operate in international society and thereby improve the capacity of global and domestic institutions to build cultures of human rights *Avoiders* Michael A.

Church Ph. D.,2016-11-03 This book was written to illuminate and clarify the pivotal role patterns of avoidance have on the development and maintenance of depression All too often this author has seen both laypersons and professionals view and treat people suffering from chronic depression as if their condition is something they are simply born with an attitudinal problem or a condition caught like some type of disease Consequently their symptoms of depression tend to receive minimal or superficial treatment in the form of antidepressant medication or pep talks aimed at getting them out of their chronic state of discontent Unfortunately these simple answers to complex issues tend to miss the core causes of how they became depressed in the first place and or what is preventing them from getting out of their misery This book focuses on the common causes of chronic depression including patterns of avoiding responsibility stress more realistic perspectives acceptance of key aspects of living as well as inappropriate escape patterns such as excessive use of drugs eating disorders compulsive gambling etc Research completed by the author on the relationship between patterns of avoidance and chronic depression is reviewed along with pertinent case study examples of how his clients backed themselves into depression and either successfully emancipated themselves from this psychological prison or continued to languish within such Finally the critical roles of acceptance and purposeful living will be discussed including 32 acceptance guidelines proposed by the author for those interested in self help or application in the service of others This book was written at a level appropriate for educated laypersons undergraduate and graduate students in psychology and related fields as well as people considering counseling or currently in psychotherapy Additionally it was written for practitioners in the mental health field who want a resource at a basic level which blends both traditional theories and therapies with more contemporary approaches such as Acceptance and Commitment Therapy

The Mentality of Partisans of the Polish Anti-Communist Underground 1944-1956 Mariusz Mazur, 2022-10-30 This book is the first study of the mentality of anti Communist underground fighters and presents especially their thinking ideals stereotypes and customs The models and psychological processes that the volume analyses are relevant not only to the Polish partisans but also to members of other underground organisations in East Central Europe South America and Asia It explores how the underground organizations were created who joined them and why what thoughts and emotions were involved and what were the consequences of the decisions to join them Experiences and situations are illustrated with excerpts of diaries and memoirs which reveal the thinking of people in extreme situations when their lives are in danger when they are caught in desperate conflicts or are fighting against overwhelming government forces The Mentality of Partisans is useful for upper level undergraduates postgraduates and scholars interested in the history of Europe resistance movements anticommunism military and political conflicts World War Two and non classical historiography

The Art of Status Jelena Subotic, Professor of Political Science Jelena Subotic, 2025-10-09 An illuminating exploration of the relationship between the restitution of looted art global status and the international construction of national cultural heritage Why is art restitution a matter of politics How does the artwork displayed in national museums reflect the international status of the state that owns it Why do some states agree to return looted art and others resist

National art collections have long been a way for states to compete with each other for status prestige and cultural worth in international society. In many former imperial nations however these collections include art looted during imperial expansions and colonial occupations. While this was once a sign of high international standing the markers of such status particularly in the context of art have since significantly changed. A new international legal and normative architecture governing art provenance developed after World War II and became institutionalized in the 1990s and 2000s. Since then there have been national and global social movements demanding the return of looted art. This shift has established not only that looting is wrong but more importantly that restitution is morally right. As a result of this reframing of what it means to own art an artifact's historical provenance has become a core element of its value and the search for provenance and demands for restitution a direct threat to state status. The same objects that granted states high international status now threaten to provoke status decline. In *The Art of Status* Jelena Subotic examines this relationship between the restitution of looted art and international status with a focus on the Parthenon Elgin Marbles the Benin Bronzes and a collection of paintings looted during the Holocaust that are now housed at the Serbian National Museum. Subotic tells the story of these artworks how they were looted how they ended up on display in national museums and how the art restitution disputes have unfolded. While these cases are different in terms of their historical context of looting and ownership claims the movements for their restitution and resistance to it illustrate the larger questions of how national cultural heritage is internationally constructed and how it serves states desire for international status and prestige. An in depth and nuanced account of art restitution disputes. *The Art of Status* illuminates the shifting political significance of art on the international stage from ownership to restitution.

The American Drug Culture Thomas S. Weinberg, Gerhard Falk, Professor Gerhard J. Falk, Ursula Adler Falk, 2017-12-14. KEY FEATURES Two opening chapters introduce readers to the theories and perspectives used by social scientists to study drugs and alcohol and to the larger trends in legal and illegal use of controlled substances. Six chapters on alcohol provide comprehensive coverage of the most widely used and abused drug in America. Lively discussions of alcohol and drugs in American popular culture bring the topic to life and relatable. Two appendices contain case histories from the authors' field research of individuals with alcohol and substance use disorders.

The Oxford Handbook of Prosocial Behavior David A. Schroeder, William G. Graziano, 2015. The Oxford Handbook of Prosocial Behavior provides a comprehensive review of the current literature on when and why people act to benefit others. It provides a comprehensive overview of the field to give both the casual reader and the neophyte to the field some perspective about fundamental questions: what, why, when, and who relative to prosocial behavior. Taking a multi-level approach, the chapters represent the broad spectrum of this multi-faceted domain. Topics range from micro-level analyses involving evolutionary and comparative psychological factors to macro-level applications such as reducing intergroup conflicts and ethnic genocide. Between these extremes, the contributors, all internationally recognized in their field, offer their perspectives on developmental processes.

that may predispose individuals to empathize with and respond to the needs of others individual differences that seem to interact with situational demands to promote helping and the underlying motivations of those helping others They explain volunteerism intragroup cooperation and intergroup cooperation to move the analysis from the individual to group level phenomena They extend the consideration of this topic to include support of pro environmental actions means to encourage participation in medical clinical trials and the promotion of world peace The ways that gender interpersonal relationships race and religion might affect decisions to give aid and support to others are also addressed The final chapter offers a unique view of prosocial behavior that encourages researchers and readers to take an even broader consideration of the field to search for a prosocial consilience
