Political Insults Karina V. Korostelina,2014-05-16 Five women entered the Cathedral of Christ the Saviour in Moscow and began a performance of a Punk Prayer Young people fried eggs on the eternal flame near the Tomb of the Unknown Soldier in Ukraine A small island in the Japan Sea provoked a diplomatic spat between the leadership of Japan and South Korea All of

these incidents are examples of politically motivated insults that escalated into surprisingly significant clashes While the field of conflict analysis has looked extensively at the dynamics of insults between individuals it has largely ignored the more complicated dynamics of insult committed between groups often of uneven political and social power In this book Karina V Korostelina offers a novel framework for analyzing the ways in which seemingly minor insults between ethnic groups nations and other types of groups escalate to disproportionately violent behavior and political conflict Insult can take many forms Yet as this book shows it is always a social act mutually defined between groups and it has the power to destabilize and redefine social and power hierarchies Korostelina identifies six different drivers of political insults producing a theoretical model for analyzing intergroup insult and conflict She uses her model to explore each of the incidents above among other recent conflicts to explicate the complicated dynamics that figure within them The book concludes with practical suggestions for analyzing and resolving complex conflict situations

Emotions in Conflict Eran Halperin, 2015-12-07 Social and political psychologists have attempted to reveal the reasons why individuals and societies that acknowledge that peace would improve their personal and collective well being and are aware of the required actions needed to promote it are simply incapable of making this step forward Some social psychologists have advocated the idea that certain societal beliefs and collective memories about the nature of the opponent the in group the history and the current state of the conflict distort the perceptions of society members and prevent them from identifying opportunities for peace But these cognitive barriers capture only part of the picture Could identifying the role of discrete emotions in conflicts and conflict resolution potentially provide a wide platform for developing pinpoint conflict resolution interventions Using a vast array of primary sources

critical literature analysis and firsthand personal experiences in various conflict zones Middle East Cyprus Bosnia and Northern Ireland Eran Halperin introduces a new perspective on psychological barriers to peace Halperin focuses on various emotional mechanisms that hamper peace processes even when parties face real opportunities for conflict resolution More specifically he explores how hatred anger fear angst hope despair empathy guilt and shame combined with various emotion regulation strategies provide emotions based explanations for people s attitudinal and behavioral reactions to peace related events during the ongoing process of conflict resolution Written in a clear and accessible style Emotions in Conflict offers a thought provoking and pioneering insight into the role discrete intergroup emotions play in impeding as well as facilitating peace processes in intractable conflicts This book is essential reading for those who study intractable conflicts and their resolutions and those who are interested in the real world implication of recent theories and findings on emotion and emotion regulation

Pride, Not Prejudice Eunbin Chung, 2022-02-28 As shown by China s relationship to Japan and Japan s relationship to South Korea even growing regional economic interdependencies are not enough to overcome bitter memories grounded in earlier wars invasions and periods of colonial domination Although efforts to ease historical animosity have been made few have proven to be successful in Northeast Asia In previous research scholars anticipated an improvement in relations through thick economic interdependence or increased societal contact In economic terms however Japan and China already trade heavily Japan has emerged as China s largest trading partner and China as second largest to Japan Societal contact is already intense as millions of Chinese Koreans and Japanese visit one another s countries annually as students tourists and on business trips But these developments have not alleviated international distrust and negative perception or resolved disagreement on what constitutes adequate reparation regarding the countries painful history Noticing clashes of strong nationalisms around the world in areas like Northeast Asia numerous studies have suggested that more peaceful relations are likely only if countries submerge or paper over existing national identities by promoting universalism Pride Not Prejudice argues to the contrary that affirmation of national identities may be a more effective way to build international cooperation If each national population reflects on the values of their national identity trust and positive perception can increase between countries This idea is consistent with the theoretical foundation that those who have a clear secure and content sense of self in turn can be more open evenhanded and less defensive toward others In addition this reduced defensiveness also enhances guilt admission by past inflictors of conflict and colonialism Eunbin Chung borrows the social psychological theory of self affirmation and applies it to an international context to argue that affirmation of a national identity or reflecting on what it means to be part of one s country can increase trust guilt recognition and positive perception between countries
