OECD Skills Studies OECD Skills Strategy Diagnostic Report: Spain 2015 OECD, 2015-09-22 Spain's economy is showing clear signs of recovery after a protracted recession. Despite these positive developments, significant challenges remain. Spain has amongst the highest unemployment rates in the OECD and the Spanish economy was still smaller in 2014 than it was in 2007. While the Global Perspectives on Learning Cities Séamus Ó Tuama, Eric Agbessi, Tina Neylon, 2015-09-01 This book examines the social, political and economic rationales which lead to the development of learning cities in diverse settings in Africa, Australia, Asia and Europe. Many of the contributors are practitioners who have played an active part in the development of their learning city. Some contributors are both practitioners and researchers on learning cities. Some are primarily researchers who are focused on understanding learning cities, gauging the benefits and potential of learning cities and formulating new theories and approaches. The book also includes interviews with and contributions from key founding figures in the learning cities movement and in the development of UNESCO's Global Network of Learning Cities. The book explores diverse initiatives that are shaping the lives of people in cities today and into the future, fostering inclusivity, sustainability and resilience. Each chapter offers a unique perspective on the transformative power of lifelong learning and collective commitment. Contributors share their insights from grassroots to high level policy discussions, shedding light on the challenges and triumphs encountered along the way. This is the first major book looking at learning cities across the globe from both theoretical and practical perspectives. What sets it apart is the diversity in the material offered and the geographical and cultural spread of contexts. Cities are becoming ever more important to the future of humanity; learning cities are a vast laboratory of new and innovative ways in which people can learn together to create more fulfilling lives, better opportunities and put into practice on a daily basis the four principles outlined in the Delors Report 1996: Learning to know, Learning to do, Learning to live together, Learning to be. This book is a valuable resource for policymakers, educators and community leaders striving to build more inclusive and sustainable societies. Whether embarking on the journey of developing a learning city or seeking inspiration from successful initiatives, readers will find practical insights and thought-provoking perspectives within these pages. Perspectives on Lifelong Learning and Global Citizenship Sarah Stanlick, Whitney Szmodis, 2022-09-06 This book lays the groundwork for the future of global citizenship and it discusses where we are now, where to go from here and how all of this fits into a lifelong learning context. It incorporates case studies, meta-narratives and empirical studies to support cosmopolitanism through a lifelong learning lens and is a must-read for educators, activists, non-governmental organizations, civil society and community organizations. The framing for this book is with the United Nations Sustainable Development Goal 4 in mind, ensuring inclusive and equitable quality education and promoting lifelong learning opportunities for all, with the intent that all learners will acquire the knowledge, skills and attitudes necessary to promote sustainable lifestyles, human rights, gender equality, promotion of a culture of peace and non

violence global citizenship and appreciation of cultural diversity and of culture's contribution to sustainable development UN Sustainable Development Goal target 4.7 It is through this lens that this book showcases the work of researchers practitioners civil society and thought leaders in global citizenship for lifelong learning While this tension between nationalism and cosmopolitanism exists the wheels of globalization still turn and shape our local national and global connections Through this exploration this book lifts up examples of global citizenship education done well across the age spectrum and in a variety of contexts The binding factor is the core values ethics and moral structure of a world in collaboration toward its larger human and ecological thriving It unpacks complex topics such as ethical and cultural relativism accountability and responsibility in a global world decolonial education and unmaking ideas of development and ethical models for community based global learning and engagement What voices are missing in the discussion of global learning and global citizenship education
