Committee on Labor and Human Resources. Subcommittee on Aging,1994 **Equity Choices and Long-Term Care Policies in Europe** August Oesterle,2017-07-05 This title was first published in 2001 Employing an interdisciplinary and comparative approach to equity in long term care this book addresses the fact that demographic changes leading to ageing populations financial pressures and changes in traditional support systems have brought long term care and the redesign of care systems to the top of the European social policy agenda Despite the importance of this issue however the question of equity in long term care has until now received relatively little attention in social policy research Rather than focusing on theories of social justice or the analysis of specific interpretations of equity this book develops key dimensions of equity choices in a framework for systematic comparative analysis This tool is then used to investigate long term care policies in Europe exploring equity choices in both the provision and the finance of long term care These choices are discussed comparatively with regard to the implications for the various actors and are also contrasted with basic welfare state objectives This book represents an important addition to comparative research into several key areas of welfare and welfare state design It explores the division of responsibilities in long term care systems between the public and private and formal and informal sectors the relationships between different welfare state objectives the different types of welfare state intervention and the principles and choices surrounding the allocation of resources and burdens *NHSQIC Annual Bibliography* National Health Standards and Quality Information Clearinghouse (U.S.),1981
