Social Acceleration A New Theory Of Modernity:

Social Acceleration Hartmut Rosa, 2013-05-14 Hartmut Rosa advances an account of the temporal structure of society from the perspective of critical theory. He identifies in particular three categories of change in the tempo of modern social life: technological acceleration evident in transportation, communication and production; the acceleration of social change reflected in cultural knowledge, social institutions and personal relationships; and acceleration in the pace of life which happens despite the expectation that technological change should increase an individual's free time. According to Rosa, both the structural and cultural aspects of our institutions and practices are marked by the shrinking of the present, a decreasing time period during which expectations based on past experience reliably match future results and events. When this phenomenon combines with technological acceleration and the increasing pace of life, time seems to flow ever faster, making our relationships to each other and the world fluid and problematic. It is as if we are standing on slipping slopes, a steep social terrain that is itself in motion and in turn demands faster lives and technology. As Rosa deftly shows, this self-reinforcing feedback loop fundamentally determines the character of modern life. *Alienation and Acceleration* Hartmut

Rosa, 2026-03-30 Modern life is speeding up constantly. While the art of saving time reaches unprecedented heights through the introduction of ever new technologies of communication and production, it nevertheless feels like we are running out of time. In all western societies, time scarcity is increasing and individuals report the impression of having to run faster and faster every year, not in order to get somewhere but just to stay where they are. In this short book, Hartmut Rosa outlines his theory of social acceleration and uses it to analyse the causes and consequences of the temporal processes that characterize modern societies. He shows that modern temporal structures are governed by the logic of an acceleration process that defines the essence of modernity. He also develops a critical theory of social acceleration, arguing that acceleration leads to severe forms of alienation from time and space, from things and actions, and from self and others, thus constituting a key obstacle to the realization of a good life in late modern society. Hartmut Rosa, 2010-11-01 Everywhere life seems to be speeding up: we talk of fast food and speed dating. But what does the

phenomenon of social acceleration really entail and how new is it While much has been written about our high speed society in the popular media serious academic analysis has lagged behind and what literature there is comes more from Europe than from America This collection of essays is a first step toward exposing readers on this side of the Atlantic to the importance of this phenomenon and toward developing some preliminary conceptual categories for better understanding it Among the major questions the volume addresses are these Is acceleration occurring across all sectors of society and all dimensions of life or is it affecting some more than others Where is life not speeding up and what results from this disparity What are the fundamental causes of acceleration as well as its consequences for everyday experience How does it affect our political and legal institutions How much speed can we tolerate The volume tackles these questions in three sections Part 1 offers a selection of astute early analyses of acceleration as experienced in the late nineteenth and early twentieth centuries Part 2 samples recent attempts at analyzing social acceleration including translations of the work of leading European thinkers Part 3 explores acceleration's political implications

Alfred Schutz, Phenomenology, and the Renewal of Interpretive Social Science Besnik Pula, 2024-04-16 In recent decades the historical social sciences have moved away from deterministic perspectives and increasingly embraced the interpretive analysis of historical process and social and political change This shift has enriched the field but also led to a deadlock regarding the meaning and status of subjective knowledge Cultural interpretivists struggle to incorporate subjective experience and the body into their understanding of social reality In the early twentieth century philosopher Alfred Schutz grappled with this very issue Drawing on Edmund Husserl's phenomenology and Max Weber's historical sociology Schutz pioneered the interpretive analysis of social life from an embodied perspective However the recent interpretivist turn influenced by linguistic philosophies discourse theory and poststructuralism has overlooked the insights of Schutz and other phenomenologists This book revisits Schutz's phenomenology and social theory positioning them against contemporary problems in social theory and interpretive social science research The book extends Schutz's key concepts of relevance symbol relations theory of language and lifeworld meaning structures It outlines Schutz's critical approach to the social distribution of knowledge and develops his nascent sociology and political economy of knowledge This book will appeal to readers with interests in social theory phenomenology and the methods of interpretive social science including historical sociology cultural sociology science and technology studies political economy and international relations

The Cosmopolitan Constitution Alexander Somek, 2014 Originally the constitution was expected to express and channel popular sovereignty It was the work of freedom springing from and facilitating collective self-determination After the Second World War this perspective changed the modern constitution owes its authority not only to collective authorship it also must commit itself credibly to human rights Thus people recede into the background and the national constitution becomes embedded into one or other system of peer review among nations This is what Alexander Somek argues is the creation of the cosmopolitan constitution Reconstructing what he considers to be the

three stages in the development of constitutionalism he argues that the cosmopolitan constitution is not a blueprint for the constitution beyond the nation state let alone a constitution of the international community rather it stands for constitutional law reaching out beyond its national bounds This cosmopolitan constitution has two faces the first political face reflects the changed circumstances of constitutional authority It conceives itself as constrained by international human rights protection firmly committed to combating discrimination on the grounds of nationality and to embracing strategies for managing its interaction with other sites of authority such as the United Nations The second administrative face of the cosmopolitan constitution reveals the demise of political authority which has been traditionally vested in representative bodies Political processes yield to various and often informal strategies of policy co ordination so long as there are no reasons to fear that the elementary civil rights might be severely interfered with It represents constitutional authority for an administered world

Me, Me, Me Jon Lawrence, 2019-09-01 Many commentators tell us that in today s world everyday life has become selfish and atomised that individuals live only to consume But are they wrong In Me Me Me Jon Lawrence re tells the story of England since the Second World War through the eyes of ordinary people including his own parents to argue that in fact friendship family and place all remain central to our daily lives and whilst community has changed it is far from dead He shows how in the years after the Second World War people came increasingly to question custom and tradition as the pressure to conform to societal standards became intolerable And as soon as they could millions escaped the closed face to face communities of Victorian Britain where everyone knew your business But this was not a rejection of community per se but an attempt to find another new way of living which was better suited to the modern world Community has become personal and voluntary based on genuine affection rather than proximity or need We have never been better connected or able to sustain the relationships that matter to us Me Me Me makes that case that it s time we valued and nurtured these new groups rather than lamenting the loss of more real forms of community it is all too easy to hold on to a nostalgic view of the past

Rohlinger, Sarah Sobieraj, 2022 The Oxford Handbook of Digital Media Sociology is an indispensable resource for students and scholars interested in understanding how new information and communications technologies shape social life Chapters written by experts from around the world explore the role digital media play in numerous contexts including the intimate and personal elements of social life such as our identities and closest relationships as well as in larger social phenomena such as racial inequality labor markets

education and war This handbook is ideal for classroom use and library acquisition as each stand alone chapter whether on dating apps or disinformation offers accessible and succinct overviews of what research has shown thus far and what questions remain unanswered **Time, Consumption and the Coordination of Everyday Life** Dale

Southerton,2020-08-17 Time pressure speed and the desire for instant consumption pervade accounts of contemporary lives Why is it that people feel pressed for time in what ways have societies changed to create this condition and with what implications This book examines critical contentions in the field of time and society ranging from the emergence and dominance of clock time and time discipline the time pressures associated with consumer culture through to technological innovation and the acceleration of everyday lives Through extensive analysis of empirical studies of the changing ways in which people organise and experience home work leisure consumption and personal relationships time pressure is shown to be a problem of the coordination and synchronization of activities Appreciation of temporal rhythms formed and reproduced through the organisation and performance of social practices is necessary to tackle the challenges of coordination and offers new avenues for analysing social issues such as sustainable consumption health and well being This book is essential reading for all of those interested in social change consumption and time including researchers and students from across the social sciences **Materiality and Popular Culture** Anna Malinowska,Karolina Lebek,2016-08-12 This book critically

approaches contemporary meanings of materiality and discusses ways in which we understand experience and engage with objects through popular culture in our private social and professional lives Appropriating Arjun Appadurai s famous phrase the social life of things with which he inspired scholars to take material culture more seriously and as a result treat it as an important and revealing area of cultural studies the book explores the relationship between material culture and popular practices and points to the impact they have exerted on our co existence with material worlds in the conditions of late modernity *The Mirror of Death* Kristof K. P. Vanhoutte,2024-04-01 How porous is the border between life and death How do the dead influence the living and in what way What can Heaven Hell Purgatory and the two Limbos tell us of our contemporary world today In *The Mirror of Death* Kristof K P Vanhoutte explores the hermeneutical potential of the regions in the hereafter After an exciting voyage through the emergence of the afterlife and of the constancy of death s presence in the history of humanity Vanhoutte shows through the study of the nature and genealogy of the various realms in the beyond how an invigoratingly new and critical perspective of a wide variety of contemporary phenomena is unveiled when reading them through the interpretative lens of these regions where the dead dwell Modern politics our fellow human beings the times of our lives the capitalistic economic system medicalization wokism and living in crisis will never look the same

Cybernetic Capitalism Jan Overwijk,2025-01-07 This book offers a conceptual interrogation of how capital navigates its cybernetic environment Taking an immanent perspective the book develops a unique synthesis between Niklas Luhmann s systems theory and the critical theory tradition Overwijk shows how neoliberal capitalism s version of rationalization depends

on the organization and management of society on the basis of cybernetic principles Overwijk seeks to update earlier critiques of cybernetic capitalism that stressed the system's colonization of its environment its making the entirety of social life communicable Under today's cybernetic rationalization things are radically different Neoliberal political economy aims to incite the incalculability of the market platform capitalists venture to capitalize on the unpredictable efforts of their users and post Fordist management seeks to encourage the creativity of service workers As this book uniquely shows capital no longer aims at total communicability but instead seeks to provoke and exploit the incommunicability of its environment In this sense it offers an ecological theory of capitalism laying conceptual the groundwork for understanding the extractivist logic of the Anthropocene Cybernetic Capitalism shows how the cultural obsession with incommunicability that animates cybernetic rationalization has taken an irrationalist turn resurfacing in the mysticism of conspiracy theory and radical right politics The book offers a novel and compelling materialist interpretation of today's paradoxical connections between neoliberal rationalism and radical right irrationalism

Socialism and the Experience of Time Julian Wright, 2017-06-30 How do we make social democracy Should we seize the unknown possibilities offered by the future or does real change develop when we focus our attention on the immediate present The modern tradition of social revolution suggested that the present is precisely the time that needs to be surpassed but can society change without an intimate focus on today's experience of social injustice In *Socialism and the Experience of Time* Julian Wright asks how socialists in France from the mid nineteenth to the mid twentieth century tried to follow a democratic commitment to the present The debate about time that emerged in French socialism lay beneath the surface of political arguments within the left But how did this focus on the present relate to the tradition of revolution in France What did socialism have to say about social experience in the present and how did this discussion shape socialism as a movement Wright examines French socialism's fascination with modern history through a new reading of Jean Jaurès's multi-authored project to write a socialist history of France since 1789 Then in four interlocking biographical essays he analyses the reformist and idealist socialism of the Third Republic long side lined in the historical literature With a sometimes emotional focus on the present times of Benoît Malon Georges Renard Marcel Sembat and Léon Blum a personal history unfolds that allows us to revisit the traditional narrative of French socialism This is not so much a story of the future hope for revolution as an intimate account of socialism intellectual engagement and the human present

Regimes of Capital in the Post-Digital Age Szymon Wróbel, Krzysztof Skonieczny, 2023-06-02 *Regimes of Capital in the Post Digital Age* provides a view of the current state of capitalism through the interrogation of key diagnoses offered by philosophers and social theorists With attention to questions about the manner in which the advent of the information age has shaped capitalism the implications of the post digital age for social capital and the possible forms of resistance to the

problematic aspects of capitalism it will appeal to scholars of sociology philosophy and social theory with interests in critical theory capitalist society and digital culture Fascism, Aviation and Mythical Modernity Fernando Esposito,2015-09-29

Flying and the pilot were significant metaphors of fascism s mythical modernity Fernando Esposito traces the changing meanings of these highly charged symbols from the air show in Brescia to the sky above the trenches of the First World War to the violent ideological clashes of the interwar period **Travel, Time, and Space in the Middle Ages and Early**

Modern Time Albrecht Classen,2018-10-22 Research on medieval and early modern travel literature has made great progress which now allows us to take the next step and to analyze the correlations between the individual and space throughout time which contributed essentially to identity formation in many different settings The contributors to this volume engage with a variety of pre modern texts images and other documents related to travel and the individual s self orientation in foreign lands and make an effort to determine the concept of identity within a spatial framework often determined by the meeting of various cultures Moreover objects images and words can also travel and connect people from different worlds through books The volume thus brings together new scholarship focused on the interrelationship of travel space time and individuality which also includes of course women s movement through the larger world whether in concrete terms or through proxy travel via readings Travel here is also examined with respect to craftsmen s activities at various sites artists employment for many different projects all over Europe and elsewhere and in terms of metaphysical experiences catabasis

Asynchronicity Philip Pond,2024-11-18 Asynchronicity is a study of the information stress and its genesis in the accelerative dynamics of computation and automation In simple terms this volume illustrates how anti democratic communication has become characteristic of our present social and political reality This book is significant in two respects By fully realising a general theory of social time it advances temporal analysis as a mode of social enquiry Grounding the production of time within the event dynamics of media systems it establishes a framework for analysing the temporal logics of digital media and shows that they may be fundamentally incompatible with the requirements of democratic communication
