Understanding and Teaching Primary Geography Simon Catling, Tessa Willy, 2018-06-18 This book outlines how good teaching of primary geography can extend children's world awareness and help them make connections between their environmental and geographical experiences. Chapters offer guidance on important learning and teaching issues as well as the use and creation of resources from the school environment to the global context. It covers all the key topics in primary geography including understanding places, physical and human geography, environmental sustainability, learning outside the classroom, global issues, citizenship and social justice. Summaries, classroom examples and practical and reflective tasks are included throughout to foster understanding and support the effective teaching of primary geography. Social Science, Junior High School, Grades Seven, Eight and Nine Denver (Colo.) Board of education, 1926 *Resources in Education*, 2001-04 *Learning Progressions in Geography Education* Osvaldo Muñiz Solari, Michael Solem, Richard Boehm, 2016-07-30 This book informs an international audience of teachers, scholars and policymakers about the development of learning progressions for primary and secondary geography education in various countries and regions of the world. The book represents an important contribution to learning progressions research and practice. The different chapters explore how curriculum standards and frameworks in different countries portray progress and sophistication in the learning of geography. The book compares educational systems and how teachers and curriculum developers use the concept of learning progression to guide educational practices. As an approach to educational research, learning progressions offer considerable potential for understanding how children develop understanding of geographic concepts and practices across grade bands and in relation to national geography standards. The book analyzes the general conditions of learning progressions within the context of a globalized world. Important themes are addressed such as knowledge acquisition in formal education, measuring learning progressions in informal settings, learning progressions for one curriculum standard or several standards, conditions to assess progression in the learning of facts, concepts and skills, and multiple pathways for understanding or learning geography. The contributing authors are experienced scientists in the field from all around the world, giving specific insights into the practices of their countries. The book appeals to K-12 teachers, school administrators, policymakers, researchers in geography education, professors and lecturers at universities around the world. **Holocaust Memory and Racism in the Postwar World** Shirli Gilbert, Avril Alba, 2019-07-08 *Holocaust Memory and Racism in the Postwar World* is intended for students and scholars of Holocaust and genocide studies, professionals working in museums and heritage organizations and anyone interested in building on their knowledge of the Holocaust and the discourse of racism.
