## **The IEEE Computer Society's 12th Annual International Symposium on Modeling, Analysis, and Simulation of Computer and Telecommunications**

**Systems (MASCOTS 2004)**, 2004 MASCOTS 2004 looks at how models can be calibrated and validated against real world observations. The papers explore wireless and mobile networks, networks and protocols, stochastic models, queueing networks, Internet architecture and applications, P2P systems, routing algorithms and storage systems.

**Society: Progress and Force (Criteria and First Principles)** Олег Арин / Алекс Бэттлер, As a sequel to Dialectics of Force Ont bia this book is dedicated to the progress and force of society topics that at first glance may seem trite since mountains of literature are written on this subject. The author however having conscientiously presented the views on progress and force of all prominent thinkers over the past and the present chose to follow a distinct path and formulated the criteria of progress based on entirely different scientific paradigms. Moreover he dared to formulate the two Principles of Social Development which are akin in their fundamental nature to the first and second laws of thermodynamics. This book is intended for teachers and students of philosophical and social sciences as well as for all those who are interested in the problems of man and humanity.
