commodification of the health care system where maximizing profit and patient's capacity to pay become the primary consideration. Applying a sociotheological approach that combines the perspectives of modern sociology, Catholic social doctrines, and Pope Francis's inductive synodal theology, as well as drawing from secondary literature, media reports, and church documents, it argues for the necessity of a holistic interdisciplinary and synodal lay Catholic social spirituality that is informed by Pope Francis's synodality. Presenting sociological research for health care practitioners to uphold options for the poor in public health, it envisions a lay spirituality that participates in civil society's health care reform agenda at the macro level and practices Christian and Ignatian discernment at the micro level as its main behavioral components. This book appeals to Christian health care actors, entrepreneurs, and spiritual directors, as well as scholars and students in sociology, religion, moral theology, bioethics, and spirituality.

Social Problems James M. Henslin, 2000. This theoretically balanced text provides the latest research findings and a consistent structure to help students analyze major social problems facing the United States. Henslin presents both sides of an argument with a neutral voice and has a down-to-earth writing style. When students complete this text, not only do they gain a sociological understanding of social problems, but also they are able to explore and evaluate their own opinions about specific social problems. They will gain a greater awareness of the social forces that shape their orientations to social problems and their perspectives on social life. The ideas in this book then can penetrate students' thinking and give shape to their views of the world.
