Academic Writing, Real World Topics - Concise Edition Michael Rectenwald, Lisa Carl, 2016-07-20 Academic Writing Real World Topics fills a void in the writing across the curriculum textbook market. It draws together articles and essays of actual academic prose as opposed to journalism; it arranges material by topic instead of by discipline or academic division and it approaches topics from multiple disciplinary and critical perspectives. With extensive introductions, rhetorical instruction, and suggested additional resources accompanying each chapter, Academic Writing Real World Topics introduces students to the kinds of research and writing that they will be expected to undertake throughout their college careers and beyond. This concise edition provides all the features of the complete edition in a more compact and affordable format.

Key Features: Contemporary cutting edge readings on relevant topics; Extensive cross referencing between the rhetoric and the reader to help students make connections; Full length essays rather than excerpts; Chapter introductions that put readings in context and promote interdisciplinary connections; Sample student essays to demonstrate student contribution; As You Read guides to each chapter that encourage readers to locate points of contact among readings; Questions after each reading that enable comprehension; help students identify rhetorical moves and prompt oral and written response.

Doing Research on Sensitive Topics Raymond M. Lee, 1993-03-16 This book is a comprehensive guide to the methodological, ethical, and practical issues involved in undertaking research on sensitive topics. Raymond M. Lee explores the reasons why social research may be politically or socially contentious, its relation to issues of social or political power, its capacity to encroach on people's lives, and its potentially problematic nature for the researcher. Issues examined include the choice of methodologies for sensitive research, problems of estimating the size of hidden populations, questions of sampling, surveying, and interviewing, and sensitivity in access and the handling of data. The book also discusses the political and ethical issues at stake in the relations between the researcher and the researched, and in the disclosure, dissemination, and publication of research.
