

Henslin, James M. 2015. *Essentials of Sociology: A Down to Earth Approach, 11<sup>th</sup> Edition*. Upper Saddle River: New Jersey. Pearson.

### Chapter 1: The Sociological Perspective

Sociological perspective:

- social contexts in which people live
- Examines how these contexts influence people's lives.
- How do groups influence people?

The sociological perspective emphasizes how the social context influences people's lives, particularly how people are influenced by society.

- Society: group of people who share a culture and a territory

Social location: corners in life that people occupy because of their place in a society.

Ex: Jobs, income, education, gender, race, age.

Gender... your gestures and the way you laugh come from you identifying with one of these groups.

C. Wright Mills...

History... each society is located in a broad stream of events.

Biography: peoples experiences within a specific historical setting, which gives them their orientations to life.

- You don't do what you do because you inherited some internal mechanism, such as instincts (like speaking English).
- Rather, external influences – your experiences – become part of your thinking and motivation.

*The Global Context – and the Local*

Back in the day, lived on isolated farms, grew their own food, and made their own clothing.

Now, internet, cell phones. At the same time that we are engulfed in instantaneous global communications, we also continue to occupy our own little corners of life.

*Origins of Sociology p. 4*

Tradition versus science.

Ancient people trying to figure out how social life works... based their answers on superstition, myth, or the positions of the stars. They did not test their assumptions.

Science requires theories that can be tested by research.

Sociology emerged about the middle of the 1800s, when observers began to use *scientific methods* to test their ideas.

- The scientific method: the use of objective and systematic observation to test theories, one that is often employed by sociologists

Industrial revolution. Moving from rural areas to cities to find work. Broke their ties to the land.

Many traditional western monarchies gave way to more democratic forms of government.

*Auguste Comte and Positivism*

Sociology: the study of society

Positivism: applying the scientific method to the social world.

The purpose of sociology would be to discover social principles and to apply them to social reform.

Sociologists would reform society, making it a better place to live.
