Soil Pollution News Report:

China's Soil Pollution and Degradation Problems Claudio O. Delang, 2017-05-18 China's air pollution is infamous. The haze can make it impossible to see buildings across the street and the pollution forces schools to close and creates health and morbidity problems in addition to tremendous environmental degradation. However, China also faces another important environmental problem which is less well known to the public: that of soil degradation and pollution. This book provides an overview of the problems related to soil degradation and pollution throughout China, examining how and why current policy has fallen short of expectation. It also examines the challenges faced by policy makers as they attempt to adopt sustainable practices alongside a booming and ever-expanding economy. China's Soil Pollution and Degradation Problems utilizes grey literature such as newspaper articles, NGO reports, and Chinese government information alongside academic studies in order to provide an extensive review of the challenges faced by grassroots organizations as they tackle environmental policy failings throughout China. This book will be of great interest to students of environmental pollution and contemporary Chinese studies looking for an introduction to the topics of soil pollution and soil degradation and for researchers looking for an extensive list of sources and analysis of China's environmental problems more broadly. **Chinese Research**

Perspectives on the Environment, Special Volume Xiao Zhang, 2020-09-25 This volume of the Chinese Research Perspectives on the Environment series is a translation of Environmental Security in China which features contributions from top researchers from Chinese universities including the Chinese Academy of Social Sciences. The ten articles following the introduction cover a range of environmental issues in four large categories with significant security implications: pollution, ecosystem deterioration, food and energy supply. In addition to long-standing environmental problems such as air, water, and soil pollution and grassland degradation, genetically modified GM foods, climate change, and China's energy dependence, which have taken on increasing urgency in recent years, are also discussed. Each chapter includes conceptual clarifications, historical overview, empirical analysis, case studies, international comparisons, and policy recommendations. **Issues in**

Soils Challenge Badge

Food and Agriculture Organization of the United Nations,2018-05-04 Soil is essential for life it provides nutrients water and minerals to plants and trees and is home to millions of insects bacteria and small animals Without soil we would not be able to grow any crops or other useful plants support any livestock or have materials for building shelter soil really is a life giver Healthy soils also store and filter water recycle nutrients and help us to deal with the negative effects of climate change by storing large amounts of carbon But our soils are at risk negative actions such as pollution and bad agricultural practices leave our soils exposed and damaged We need healthy soils to support human well being and a healthy planet This is where the Soils Challenge Badge comes in let it take you on a journey to discover the ground beneath your feet This booklet is packed with activities to help you learn about soil and how it is formed the creatures that live in it and just how important it is in our everyday lives You will also discover how YOU can play a role in protecting soils for future generations We hope you will be inspired to take the challenge and celebrate our planet s soils Dig in

Communication and Environment: Sustainability and Risks (Penerbit USM)
Hamidah Abd. Hamid, Azman Azwan Azmawati, Jamilah Hj. Ahmad, Nik Norma Nik Hasan, 2014-11-25

There is a dearth of literature on environmental communication within the non western world The few existing ones are scattered and not easily available Thus there is a dire need to document research and literature in the field The opportunity arose at the 2009 International Conference on Communication and Environment held in Penang Malaysia The international conference with the theme Transformation for a Sustainable Tomorrow organised by the School of Communication Universiti Sains Malaysia USM attracted scholars practitioners and activists from around the world to listen and deliberate on various aspects of communication and environment The post conference review resulted in the selection of 24 papers to be compiled into this edited volume The escalating degradation of environment locally and globally was the main concern that prompted discussions on how sustainability can be advocated The development process in many countries economic activities and political decisions on issues such as deforestation for timber logging rapid urbanisation pertinently points out that environmental degradation and any communication on environmental change has to be grounded and located within the wider context of social politics and economics of the society Communication and environmental communication for that matter have also to be understood within these wider contexts Many would agree that a constant and consistent flow of information communicated through different channels to different stakeholders at the right time and destinations can help raise awareness and consciousness of environmental problems protection and preservation This vital information can enable the public and stakeholders to make informed choices and take actions whenever possible A lack of communication and information will inordinately exacerbate the situation of environmental degradation This book thus highlights how the environment is being treated in the media communicated to the society and impacted nations The chapters are grouped into the following sections Theoretical and conceptual issues Media content and the environment Politics communication and the environment Corporate social and environmental responsibility and Citizen participation human rights and the environment The editors acknowledge the excellent contributions of all the authors and are indebted to the members of the review panel the external reviewer USM Publications Committee and staff of Universiti Sains Malaysia Press for their help in ensuring the quality of this volume Most importantly we express our gratitude to USM for providing the financial support for the international conference and making it possible to publish this book The Editors January 2012 Universiti Sains Malaysia
