Shashidhar,2012-05-25 Electronics I is intended to be used as a text book for II Semester Diploma in Electrical and Electronics Engineering The motivation for writing this book came when I felt the absence of a suitable text for Polytechnic students This book is meant to fill the void It is designed for comprehensively covering all topics relevant to the subject Each and every topic has been explained in a very simple language as per the syllabus prescribed by the Board of Technical Education To enhance the utility of the book important points and review questions Fill in the blank and descriptive type have been included at the end of each chapter Model question papers have been provided to help students prepare better for the semester examinations It is hoped that this book will be of immense use to teachers and students of Polytechnics Any constructive suggestions from teachers and students for

improving the contents will be warmly appreciated

Artificial Intelligence of Things for Smart Green Energy

Management Sarah El Himer, Mariyam Ouaisa, Abdulrahman A. A. Emhemed, Mariya Ouaisa, Zakaria Boulouard, 2022-06-23

This book is intended to assist in the development of smart and efficient green energy solutions. It introduces energy systems, power generation and power demands which are able to minimise generation costs, power loss or environmental effects. It proposes cutting edge solutions and approaches based on recent technologies such as intelligent renewable energy systems, wind and solar. These solutions applied to different sectors can provide a solid basis for meeting the needs of both developed and developing countries. The book provides a collection of contributions including new techniques, methods, algorithms, practical solutions and models based on applying artificial intelligence and the Internet of things into green energy management systems. It provides a comprehensive reference for researchers, scholars and industry in the field of green energy and computational intelligence.

Recent Advances in Material, Manufacturing, and Machine Learning Bjorn

Schuller, Rajeev Gupta, Rakesh Mote, Abhishek Sharma, J.P. Giri, R.B. Chadge, 2024-06-17. The main aim of the 2nd international conference on recent advances in materials, manufacturing and machine learning processes 2023 RAMMML 23 is to bring together all interested academic researchers, scientists, engineers and technocrats and provide a platform for continuous improvement of manufacturing, machine learning, design and materials engineering research. RAMMML 2023 received an overwhelming response with more than 530 full paper submissions. After due and careful scrutiny, about 120 of them have been selected for presentation. The papers submitted have been reviewed by experts from renowned institutions and subsequently the authors have revised the papers duly incorporating the suggestions of the reviewers. This has led to significant improvement in the quality of the contributions. Taylor Francis publications, CRC Press, have agreed to publish the selected proceedings of the conference in their book series of Advances in Mechanical Engineering and Interdisciplinary Sciences. This enables fast dissemination of the papers worldwide and increases the scope of visibility for the research contributions of the authors.
