Solar Design For Houses Guide:

A Handbook on Low-Energy Buildings and District-Energy Systems L.D. Danny Harvey, 2012-08-21 Winner of Choice Magazine Outstanding Academic Titles for 2007 Buildings account for over one third of global energy use and associated greenhouse gas emissions worldwide Reducing energy use by buildings is therefore an essential part of any strategy to reduce greenhouse gas emissions and thereby lessen the likelihood of potentially catastrophic climate change Bringing together a wealth of hard to obtain information on energy use and energy efficiency in buildings at a level which can be easily digested and applied Danny Harvey offers a comprehensive objective and critical sourcebook on low energy buildings Topics covered include thermal envelopes heating cooling heat pumps HVAC systems hot water lighting solar energy appliances and office equipment embodied energy buildings as systems and community integrated energy systems cogeneration district heating and district cooling The book includes exemplary buildings and techniques from North America Europe and Asia and combines a broad holistic perspective with technical detail in an accessible and insightful manner

Ecohouse: A Design Guide Christopher Day, Susan Roaf, 2007-08-15 Ecohouse is an exciting and timely text that tells you how to design low energy environmentally friendly buildings today It also provides the foundations for building design in a warming world and stepping stones towards the zero carbon emission buildings of tomorrow Sue Roaf is famed for her approach to design and her awareness of energy efficiency Here she reveals the concepts structures and techniques that lie behind the realization of her ideals By using her own house as a case study Roaf guides the reader through the ideas for energy efficient design or eco design This guide to the ecohouse also explores 21 case studies from around the world from Norway and Sweden to India and Japan Argentina and Mexico Chapters by Christopher Day Katherine Bohn and Andre Viljoen on ecological building materials and methods and a contribution by Robert and Brenda Vale all experts in this field Ecohouse has a regularly updated companion web site providing further information on all issues relating to Ecohouse and eco design Log on to www.bh.com/companions/ecohouse for a direct link The Building Environment Vaughn Bradshaw, 2010-09-29 Get the updated guide to active and passive control systems for buildings To capitalize on today's rapidly evolving specialized technologies architects designers builders and contractors work together to plan the mechanical and electrical equipment that controls the indoor environment of a building The Building Environment Active and Passive Control Systems Third Edition helps you take advantage of design innovations and construction strategies that maximize the comfort safety and energy efficiency of buildings From active HVAC systems to passive methods lighting to on site power generation this updated edition explains how to strategically plan for and incorporate effective efficient systems in today's buildings It covers the underlying thermal theories and thermodynamic principles and focuses on design that enhances the building environment and minimizes the impact on the world's environment The Building Environment goes beyond the ABCs of HVAC and covers On site power generation including wind turbines solar photovoltaic cells fuel cells and more Plumbing
