

Name:

Date:

Student Exploration: Solar System Explorer

Vocabulary: astronomical unit, dwarf planet, eccentricity, ellipse, gas giant, Kepler's laws, orbit, orbital radius, period, planet, solar system, terrestrial planet

Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

1. List all of the **planets** you can think of in our **solar system**. Try to list them in order from closest to farthest from the Sun.

Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, Neptune, Pluto.

2. Which planets are most like Earth? Which are most different from Earth? Explain.

Planets like Mars and Venus would be very similar due to how close to the Sun they are and their rotations. Planets like Mercury and Neptune are not like Earth at all because of their distances from the Sun. Mercury is very hot and Neptune is very cold. Earth is in between both of these temperatures making it more similar to Venus and Mars.

Gizmo Warm-up

The *Solar System Explorer* Gizmo shows a model of the solar system. All of the distances, but not the sizes of the planets, are shown to scale. To begin, turn on **Show orbital paths** and click **Play** (). You are looking at the four inner planets.

1. In which direction do planets go around the Sun, clockwise or counterclockwise?

The planets rotate counterclockwise around the sun

2. An **orbit** is the path of a body around another body.

What is the shape of the planetary orbits around the Sun?

A circle/oval

3. Click **Pause** (). You can see the name of each planet by holding your cursor over the planet. What is the order of the eight planets, starting from the Sun? Click the "zoom out" button () to see the outer planets and Pluto, which is classified as a **dwarf planet**.

Sun, Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, Neptune, Pluto.
