Cosmos, Earth and Nutrition Richard Thornton Smith, 2013-04-03 In recent years there has been an explosion of interest in organic and biodynamic produce Although once marginal and alternative escalating concerns about the environment health food quality and animal welfare have brought organics into mainstream consciousness Biodynamics a unique development of the organic approach does not narrowly focus on agricultural techniques It was conceived as a new way of thinking about farming nutrition and the world of nature allowing for a revitalized relationship with the living soil the elemental world and the cosmos Originating from a series of eight lectures given by Dr Rudolf Steiner in 1924 biodynamics broadens the outlook of agriculture and the science behind it leading to a holistic perspective that incorporates astronomical rhythms and unique preparations for plants and earth The author describes the foundations on which not only biodynamics but also the wider organic movement is based He builds bridges between mainstream science and Steiner's insights making it easier for the wider organic and ecological movement to approach biodynamic concepts and practise This book has much to offer to the beginner as well as to those already involved with biodynamics Its broad range of topics including the ecology of the farm organism food quality and nutrition community supported agriculture planetary influences seed quality and the vitality of water contribute to a deeper understanding of the subject The author is also concerned to promote innovation so that biodynamics moves with the times An appendix includes details for contacting various elements of the biodynamic world DR RICHARD THORNTON SMITH was formerly a geography professor at the University of Leeds specializing in soil science environment and conservation Widely travelled he has a long standing interest in indigenous and sustainable farming He was introduced to the work of Rudolf Steiner at an early age although his full involvement with biodynamics dates from 1990 when he began to participate in

training programmes and workshops at Emerson College Sussex In 1996 he began a biodynamic extension programme in Sri Lanka for which he published a book most recently updated in 2007 Since 2001 he has been an inspector for the Biodynamic Association s Demeter and Organic Certification in the UK In 2003 he produced an edited selection of Steiner s work relating to agriculture He is currently a council member of the Biodynamic Agricultural Association and lives in Ross on Wye Herefordshire
