The essays in this book are the distillation of years of reflection writing lecturing and active participation in the ongoing debate on the cultural identity of the European Union the vicissitudes of the transatlantic dialogue the envisioning of new social paradigms the building of more solid and more relevant bridges of understanding between two continents that have a common Western humanistic tradition albeit synthesized to other cultures in America While the approach is personal it remains interdisciplinary and holistic throughout rooted in the poetic philosophy of history of Giambattista Vico and encompassing literature philosophy myth linguistics and political science on the edge of boundaries between the historical grand narrative the religious and even the quotidian and the anecdotal These thirty essays trace the origins of Western Civilization and the synthesis of Humanism and Christianity that is the Renaissance but also Janus like face they look forward to a new Renaissance and humanistic synthesis yet to be envisioned and forged that will dare to be both old and new that will encompass the poetical as well as the rational without losing sight of the universality of our common humanity The journey may be long arduous but it has already begun some sixty years ago Moreover these essays will appeal especially to those readers who are perplexed at the loss of humanistic modes of thought in our post modern technological society A book sure to stimulate the intellect and the imagination of its readers They are given to understand from the outset that Europe more than a geographical political reality is an evolving idea and it is her destiny to live or die as such The readers will be provided with a Vichian chart to assist them in intellectually navigating and journey on this unique idea called Europa *A Constant Journey* Erika Ostrovsky, 1991 From the creation of a neuter pronoun in her earliest work *L Opoanax* to the confusion of genres in her most recent fiction *Virgile non Monique* Wittig uses literary subversion and invention to accomplish what Erika Ostrovsky appropriately defines as *renversement* the annihilation of existing literary canons and the creation of highly innovative constructs Erika Ostrovsky explores those aspects of Wittig s work that best illustrate her literary approach

Among the countless revolutionary devices that Wittig uses to achieve renversement are the feminization of masculine gender names the reorganization of myth patterns and the replacement of traditional punctuation with her own system of grammatical emphasis and separation It is the unexpected quantity and quality of such literary devices that make reading Monique Wittig s fiction a fresh and rewarding experience Such literary devices have earned Wittig the acclaim of her critics and peers Marguerite Duras Mary McCarthy Alain Robbe Grillet Nathalie Sarraute and Claude Simon to name a few While analyzing the intrinsic value of each of Wittig s fictions separately Erika Ostrovsky traces the progressive development of Wittig s major literary devices as they appear and reappear in her fictions Ostrovsky maintains that the seeds of those innovations that appear in Wittig s most recent texts can be found as far back as *L Opoponax* This evidence of progression supports Ostrovsky s theory that clues to Wittig s future endeavors can be found in her past

The end of the Western Civilization? The Intellectual Journey of Humanity to Adulthood Hippokratis Kiaris,2022 Civilizations can be perceived as living human beings that are born mature age and ultimately die and disappear passing their legacy to the future generations These transitions may be projected to the different stages of cognitive development of children The Western Civilization which embodies our current state of cultural advancement from the Classic Greek to the modern period can be paralleled by the gradual transitions of human beings toward adulthood From this perspective the ancient Greek era resembles the toddler years of humanity at which the first why type questions are being asked The theocratic period that followed until the Renaissance can be seen as our childhood when people lived their lives under the tight boundaries set by religious authorities The period spanning from the Enlightenment until almost the end of the 20th century can be considered as our teenage years when people rediscover their past are liberated from superstition and set the path forward based on reason by a manner at which the distinction between plausible and feasible is vague Within this scheme postmodernism also finds its place in our teenhood The last few decades from this perspective signify our entrance to adulthood at which major questions are considered answered or at least settled and the only path forward perceived as feasible is the one that is followed already a state that is bringing us closer to our intellectual aging and its inevitable death Some signs of aging related pathologies are already manifested in today s technology intensive society By identifying our intellectual age and by appreciating our health status we may be able to proactively delay or even avert our intellectual aging and death
