The Search for Survival Henry C. Lucas Jr., 2012-06-06 Ideal for business students business managers and corporate senior executives this book distills the lessons learned from the disasters that have befallen companies that were unable to cope with disruptive technologies In recent decades technology has changed rapidly to the point that it can very quickly affect a seemingly impregnable company or industry Unexpected technological developments enable innovators to offer new products and services that threaten incumbents In order to survive existing firms must be able to see a disruption on the horizon and figure out how to respond The Search for Survival Lessons from Disruptive Technologies examines organizations that failed to develop a strategy for coping with a technological disruption and have suffered greatly or even gone out of business The first chapter presents a model of how firms can respond to and hopefully survive a disruptive technology Each following chapter focuses on firms that have failed to survive or whose future is in doubt accompanied by an extensive detailed discussion of the lessons learned from each company or field's failings covering examples from industries such as recorded music book publishing video newspaper and higher education

Consumer Optimization Problem Solving Alfred L Norman, 2014-12-15 What algorithms are tractable depends on the speed of the processor Given the speed of digital computers polynomial algorithms are considered tractable But a human can take several seconds to make one binary comparison between two pens Given this slow speed sublinear algorithms are considered tractable for an unaided human and this defines Simon's concept of bounded rationality Humans make simplifications to solve the intractable consumer optimization problem Consumers search for goods and services item by item which greatly reduces the number of alternatives to consider In addition consumers have operators that can process a set in

a single operation Also consumers budget by incremental adjustment In considering consumer performance the question to ask is how close to optimal is consumer performance and not whether consumers optimize as a yes no question Given the ordinal nature of utility theory this creates a basic measurement problem The book presents a review of the literature on consumer performance This is an opportune time to study consumer procedures because the Internet provides a media to make substantial improvements in consumer performance The book includes a case study comparing the performance of a digital camera selection code with the advice of sales people A field experiment demonstrates that the software code provides better advice

Shadow Libraries Joe

Karaganis, 2018-05-04 How students get the materials they need as opportunities for higher education expand but funding shrinks From the top down *Shadow Libraries* explores the institutions that shape the provision of educational materials from the formal sector of universities and publishers to the broadly informal ones organized by faculty copy shops student unions and students themselves It looks at the history of policy battles over access to education in the post World War II era and at the narrower versions that have played out in relation to research and textbooks from library policies to book subsidies to more recently the several open publication models that have emerged in the higher education sector From the bottom up *Shadow Libraries* explores how simply students get the materials they need It maps the ubiquitous practice of photocopying and what are in many cases the more marginal ones of buying books visiting libraries and downloading from unauthorized sources It looks at the informal networks that emerge in many contexts to share materials from face to face student networks to Facebook groups and at the processes that lead to the consolidation of some of those efforts into more organized archives that circulate offline and sometimes online the shadow libraries of the title If Alexandra Elbakyan's Sci Hub is the largest of these efforts to date the more characteristic part of her story is the prologue the personal struggle to participate in global scientific and educational communities and the recourse to a wide array of ad hoc strategies and networks when formal authorized means are lacking If Elbakyan's story has struck a chord it is in part because it brings this contradiction in the academic project into sharp relief universalist in principle and unequal in practice *Shadow Libraries* is a study of that tension in the digital era Contributors Bal zs Bod Laura Czerniewicz Mirosław Filiciak Mariana Fossatti Jorge Gómetto Eve Gray Evelin Heidel Joe Karaganis Lawrence Liang Pedro Mizukami Jhessica Reia Alek Tarkowski
