Bibliography of English Literature: Volume 2, 1660-1800 George Watson,Ian R. Willison,1971-07-02 More than fifty specialists have contributed to this new edition of volume 2 of The Cambridge Bibliography of English Literature The design of the original work has established itself so firmly as a workable solution to the immense problems of analysis articulation and coordination that it has been retained in all its essentials for the new edition The task of the new contributors has been to revise and integrate the lists of 1940 and 1957 to add materials of the following decade to correct and refine the bibliographical details already available and to re shape the whole according to a new series of conventions devised to give greater clarity and consistency to the entries *Greek East and Latin West* Andrew Louth,2007 This volume gives an account of the Church in the period from the end of the Sixth Ecumenical Synod in 681 to the Battle of Manzikert in 1071 Although Greek East and Latin West are becoming distinct entities during this expanse of time the author treats them in parallel observing the points at which their destinies coincide or conflict The author notes developments within the whole of the Church rather than striving simply or even primarily to explain the eventual schism between Eastern and Western Christendom Covering events both unique to each part the Iconoclastic controversy in the East and the rise of the Carolingian Empire in the West and common to each part monastic reform renaissance and mission the author skillfully portrays two Christian civilizations that share much in common yet become increasingly incomprehensible to one another Despite curious synchronisms between East and West the author demonstrates how two paths diverged from a once common route and how eventually Byzantine Orthodoxy defined the Greek East over and against the Latin West in theological religious cultural and political terms Provided by publisher **British Museum Catalogue of printed Books** ,1881
