electronics Since the original edition the applications of coatings for the environmental protection of electronic systems have  
greatly increased largely driven by the competitive need to reduce costs weight and volume The demands for high speed  
circuits for the rapid processing of signals and data high density circuits for the storage and retrieval of megabits of memory  
and the improved reliability required of electronics for guiding and controlling weapons and space vehicles have triggered  
the development of many new and improved coating polymers and formulations Both the theoretical aspects of coatings  
molecular structure of polymer types and their correlation with electrical and physical properties and applied aspects  
functions deposition processes applications testing are covered in the book Over 100 proprietary coating formulations were  
reviewed their properties collated and tables of comparative properties prepared This book is useful as both a primer and as
