Knowledge Sharing in the Integrated Enterprise Peter Bernus, Mark Fox, 2006-03-09 Enterprise Architects in their endeavor to achieve Enterprise Integration have limited guidance on how best to use Enterprise Models and Modeling Tools to support their practice It is widely recognized that the practice of engineering enterprises needs a number of models but how to maintain the relation between these models with ease is still a problem Model interoperability is an issue on multiple counts How to interchange models between enterprise modeling tools How to maintain the interdependencies between models whether they describe the enterprise on the same level but from different points of view or from the same point of view but on different levels of abstraction and granularity How to maintain a coherent and evolving set of enterprise models in support of continuous change processes How to use and reuse enterprise models as a knowledge resource The answers to these questions are of great importance to anyone who is implementing ISO9001 2000 requirements whether through using enterprise architecture practice or not although it can be argued that a well executed architecture practice should satisfy ISO9001 without additional effort This volume attacks the problem on three fronts 1 Authors working in international standardisation and tool development as well as in enterprise modeling research present the latest developments in semantic integration 2 Authors who are practitioners of or conducting active research in enterprise architecting methodologies give an account on the latest developments and strategic directions in architecture frameworks and methodologies 3 Authors who use or develop information integration infrastructures present best practice and future trends of this aspect of enterprise integration Chapters of this book include contributions to the International Conference on Enterprise Integration and Modelling Technology ICEIMT 04 and those presented at the Design of Information Infrastructure Systems for

But Wait, There's More... Robert Crawford,2008-01-01 Catchy phrases chants at cricket matches and jingles which consumers just can't get out of their heads the best advertising stands out because it is creative clever and most importantly funny Advertising in Australia can be traced back to the early 1900s when spruikers wooed the public with appeals to vanity health and patriotism By the time Australia had endured two World Wars the Depression economic downturns political upheavals and direct confrontations the advertising industry had not only survived but had become a multi billion dollar industry with an enormous influence over people's everyday lives and their spending habits But Wait There's More is the first detailed history of the Australian advertising industry exploring its development over the course of the twentieth century from a disorganised group of individuals selling newspaper space to a multi billion dollar enterprise run by giant transnationals It follows the admen and adwomen who worked to convert their audiences into consumers and examines their ongoing quest for legitimacy in the face of new technologies and an increasingly sophisticated and media savvy audience

The Policing of Flows Anthony Amicelle,Karine Cote-Boucher,Benoît Dupont,Massimiliano Mulone,Clifford Shearing,Samuel Tanner,2020-05-21 Rectifying the fact that little criminological attention has been paid to the notion that the security of flows increasingly embodies concerns at the heart of contemporary policing practices this book makes a significant contribution to knowledge about the policing and security governance of flows The book focuses on how the growing centrality of flows affects both contemporary risks and the policing organisations in charge of managing them The contributors analyse flows such as event security border controls and migration the movement of animal parts security related intelligence and organisational flows The emerging criminology of these as well as flows of money information and numerous commodities from pharmaceuticals to minerals or malicious software is leading to critical advances in the understanding of the changing harm landscapes and the practices that have developed to manage them Taken as a whole the book opens up the conversation and encourages the invention of new conceptual theoretical and methodological tools to help criminology tackle and better understand the mobile world in which we live This book was originally published as a special issue of Global Crime Catalog of Copyright Entries.
