Feature Films in English Language Teaching deals with the use of motion pictures in the advanced EFL English as a foreign language classroom. It provides a general introduction to film literacy and explains the rationale, methods and objectives of working with feature films. In addition, the book contains in-depth considerations on sixteen selected films which are grouped regionally: Australia, New Zealand, South Africa, USA, Great Britain. Each chapter describes the topical focus of the film and its central theme and provides background information on social, historical, political and geographical issues. A profound analysis of selected scenes lays the foundation for considerations on the teaching potential of the film. In a download section, the chapters are complemented with ready-to-use teaching materials on film-specific aspects: narrative, dramatic and cinematographic dimensions, which are organised as pre-while-post viewing activities. A glossary on technical terms for film analysis completes the volume.

**Teaching Literature to Adolescents** Richard Beach, Deborah Appleman, Susan Hynds, Jeffrey Wilhelm, 2013-08-21. This text for pre-service and in-service English education courses presents current methods of teaching literature to middle and high school students. The methods are based on social constructivist socio-cultural theories of literacy learning and incorporate research on literary response conducted by the authors. *Teaching Literature to Adolescents* is a totally new text that draws on ideas from the best-selling textbook *Teaching Literature in the Secondary School* by Beach and Marshall. It reflects and builds on recent key developments in theory and practice in the field, including the importance of providing students with a range of critical lenses for analyzing texts and interrogating the beliefs, attitudes and ideological perspectives encountered in literature; organization of the literature curriculum around topics, themes or issues; infusion of multicultural literature and emphasis on how writers portray race, class and gender differences; use of drama as a tool for enhancing understanding of texts; employment of a range of different ways to write about literature; integration of critical analysis of film and media texts with the study of literature; blending of quality young adult literature into the curriculum; and attention to students who have difficulty succeeding in literature classes due to reading difficulties, disparities between school and home cultures, attitudes toward school English or lack of engagement with assigned texts or response activities. The interactive Web site contains recommended readings, resources and activities, links to Web sites and PowerPoint presentations, and opportunities for readers to contribute teaching units to the Web site databases. Instructors and students in middle and high school English methods courses will appreciate the clear, engaging, useful integration of theory, methods and pedagogical features offered in this text.

**Applying Language Science to Language Pedagogy** José Manuel Igoa, Montserrat Sanz, 2011-12-08. This book establishes a bridge between current research in Linguistics and Psycholinguistics and language pedagogy in the classroom. It reformulates the debates about teaching approaches by calling the reader's attention to discoveries about the structure of grammar, the universals of language, mind processes while comprehending, producing and storing language, and facts about learning. The popularization of L2 teaching brought with it a need to find efficient teaching methods. Debates have hinged mainly around the alleged advantages of communicative vs

traditional methods However most approaches have their roots in linguistic and psychological theories that have been questioned by language researchers Some language teachers are probably unaware of these advances and to that extent continue to adhere to teaching approaches mainly based on intuitions Consequently evaluating materials may be often performed in rather uninformed circumstances The book contains chapters on relevant issues by leading researchers classified into three main areas The editors contribute a chapter to each of these sections about the implications for second language teaching This book facilitates an approximation between researchers in the theoretical and experimental fields of language and those responsible for innovation in language teaching It is designed so that L2 teachers can adopt and adjust the knowledge drawn from the book to their particular environment and group of students
