Wheeler Winston Dixon,2013-05-01 Film stocks are vanishing but the iconic images of the silver screen remain albeit in new sleeker formats Today viewers can instantly stream movies on televisions computers and smartphones Gone are the days when films could only be seen in theaters or rented at video stores movies are now accessible at the click of a button and there are no reels tapes or discs to store Any film or show worth keeping may be collected in the virtual cloud and accessed at will through services like Netflix Hulu and Amazon Instant The movies have changed and we are changing with them The ways we communicate receive information travel and socialize have all been revolutionized In Streaming Wheeler Winston Dixon reveals the positive and negative consequences of the transition to digital formatting and distribution exploring the ways in which digital cinema has altered contemporary filmmaking and our culture Many industry professionals and audience members feel that the new format fundamentally alters the art while others laud the liberation of the moving image from the imperfect medium of film asserting that it is both inevitable and desirable Dixon argues that the change is neither good nor bad it s simply a fact Hollywood has embraced digital production and distribution because it is easier faster and cheaper but the displacement of older technology will not come without controversy This groundbreaking book illuminates the challenges of preserving media in the digital age and explores what stands to be lost from the rich hues of traditional film stocks to the classic movies that are not profitable enough to offer in streaming formats Dixon also investigates the financial challenges of the new distribution model the incorporation of new content such as webisodes and the issue of ownership in an age when companies have the power to pull purchased items from consumer devices at their own discretion Streaming touches on every aspect of the shift to digital production and distribution It explains not only how the new technology is affecting movies music books and games but also how instant access is permanently changing the habits of viewers and influencing our culture **Information Technology in Medical Diagnostics II** Waldemar Wójcik,Sergii Pavlov,Maksat

2012 Pacherie 2008 Synofzik et al 2008 and scientific investigations have shed light on the neurocognitive basis of sense of agency including the brain regions supporting sense of agency Chambon et al 2013 David et al 2007 Farrer et al 2003 2008 Spengler et al 2009 Tsakiris et al 2010 Yomogida et al 2010 Despite this progress there remain a number of outstanding questions such as Are there cross cultural differences in the sense of agency How does the sense of agency develop in infants or change across the lifespan How does social context influence sense of agency What neural networks support sense of agency i e connectivity and communication between brain regions What are the temporal dynamics with respect to neural processes underlying the sense of agency i e the what and when of agency processing How can different cue models of the sense of agency be further specified and empirically supported especially with regards to cue integration weighting What are the applications of sense of agency research clinically engineering etc The concept of the sense of agency offers intriguing avenues for knowledge transfer across disciplines and interdisciplinary empirical approaches especially in addressing the afore mentioned outstanding questions The aim of the present research topic is to promote and facilitate such interdisciplinarity for a better understanding of why and how we typically experience our own actions so naturally and undoubtedly as ours and what goes awry when we do not We thus welcome contributions from for example i neuroscience and psychology including development psychology neuroscience ii psychiatry and neurology iii philosophy iv robotics and v computational modeling In addition to empirical or scientific studies of the sense of agency we also encourage theoretical contributions including reviews models and opinions
