LEFT & RIGHT WHEEL LOCK CHECKING

This test is only necessary if:

- The steering lock is stuck by more than 2 degrees when the steering wheel is turning counter-clockwise.
- One side has contact between tire and a front axle component or body at full lock.
- Turning circles left/right differ.

The distance between front axle components and tires (arrow) must be the same at full lock (full turn left/right). See Fig. 10. If the distances are unequal, this can be corrected by turning left/right tie rod.
