one that has recently been adopted by practitioners as a basis on which to design human resource management and career management practices. However, there has been some concern in academic circles about the validity of the notion of generations and the evidence base that supports it. There is therefore a need for new perspectives and methodological approaches to investigating generational differences at work in order to establish the validity and value of generations as an axis of diversity. *Generational Diversity at Work: New Research Perspectives* will address this need by presenting and discussing research into generational diversity that adopts a range of new theoretical perspectives or methodological approaches. This book is designed as a first step in addressing the need to critically examine the theoretical and empirical basis for generational differences and to provide some new empirical data in this area.

Information Issues for Older Americans William Aspray, 2022-02-09 There are more than 50 million people age 65 or older in the United States and over the decade 2010-2019 this was the fastest growing age sector in the United States growing by 34% during that period. US Census Bureau As people age they face a number of new challenges and opportunities ranging from the shift from salary to Social Security and retirement funds increasing issues with health and opportunities for extended relaxation and second careers. While seniors bring a lifetime of experience and honed skills they face a number of new situations that involved learning new information and new ways of doing things. *Information Issues for Older Americans* brings together faculty from the leading Information Schools to examine information needs, behavior, and policy related to older Americans. These scholars use a variety of lenses to understand the information issues that older Americans face in their everyday lives. These lenses include information literacy from both the consumer and provider sides, information behavior to understand search strategies, evaluation of information quality and relevance, sources used, questions raised, and how these change over time, the information ecologies in which an individual lives in his or her private and professional worlds, privacy issues that arise in everyday life, information and communication technologies (ICTs) including the skills of users with these technologies, the expected and unexpected uses of these technologies and the technology's positive and negative impacts, how ICTs can be used to augment human intelligence and physical skills, human computer interaction and design, how ICTs together with traditional information institutions such as libraries and museums and social clubs have been used to build stronger communities, community informatics. This book is a contribution to the academic literatures on information studies and aging but it is also intended to be generally readable and be accessible to the educated public and professionals who serve older Americans such as librarians, health care workers, and workers at community centers. While there is a growing literature on health informatics for the elderly and occasional journal articles on various other topics about information and the elderly, this is the first comprehensive book on the various information aspects of the everyday activities and concerns of older Americans.

The Almanac of Quotable Quotes from 1990, 1991 *A Foot in Two Worlds* Vincent D. Homan, 2013 After the untimely death of his son a pastor learns he must find a balance between grief and Christian hope ultimately discovering that embracing one does not diminish the other He learns grief is not an illness one must recover from but a journey one must walk *A Foot in Two Worlds* examines the intense grief that accompanies tragic loss and demonstrates how it interacts with our perception of goodness

innocence and God Each chapter explores the conflicting life experiences that tragedy or loss often forces onto people who trust in a good God Grief is a nondiscriminatory offender striking the hearts and homes of its victims This story welcomes the grief stricken to a place of middle ground where faith doubt hope and loss coexist starting the move from innocence to a hopeful reality Of the many books on grief few offer permission to the bereaved to develop a new normalcy by embracing both grief and hope A Foot in Two Worlds targets several significant needs It compassionately reaches out to the entire community of the bereaved with special grace offered to brokenhearted parents It gives a deeper look into the heart of grief and mourning Finally through stories and scripture the book offers direction and understanding to those who provide care to family members and friends who suffer tragic loss
