Above Ground Biomass Lalit Kumar, Onesimo Mutanga, 2019-08-20 Above ground biomass has been listed by the Intergovernmental Panel on Climate Change as one of the five most prominent visible and dynamic terrestrial carbon pools. The increased awareness of the impacts of climate change has seen a burgeoning need to consistently assess carbon stocks to combat carbon sequestration. An accurate estimation of carbon stocks and an understanding of the carbon sources and sinks can aid the improvement and accuracy of carbon flux models, an important pre-requisite of climate change impact projections. Based on 15 research topics, this book demonstrates the role of remote sensing in quantifying above ground biomass in forest, grass, woodlands across varying spatial and temporal scales. The innovative application areas of the book include algorithm development and implementation, accuracy assessment, scaling issues, local, regional, global biomass mapping, and the integration of microwaves i.e. LiDAR along with optical sensors for forest biomass mapping, rangeland productivity and abundance, grass biomass density, cover, bush encroachment, biomass, and seasonal and long-term biomass monitoring.

Exploring Cross-linguistic Effects and Phonetic Interactions in the Context of Bilingualism Mark Amengual, 2021-07-21

This Special Issue includes fifteen original state-of-the-art research articles from leading scholars that examine cross-linguistic influence in bilingual speech. These experimental studies contribute to the growing number of studies on multilingual phonetics and phonology by introducing novel empirical data collection techniques, sophisticated methodologies, and acoustic analyses while also presenting findings that provide robust theoretical implications to a variety of subfields such as L2 acquisition, L3 acquisition, laboratory phonology, acoustic phonetics, psycholinguistics, sociophonetics, bilingualism, and language contact. These studies in this book further elucidate the nature of phonetic interactions in the context of bilingualism and multilingualism and outline future directions in multilingual phonetics and phonology research.

Alternatives in Grammar and Cognition Nicole Gotzner, Jesse A. Harris, Richard Breheny, Yael Sharvit, 2025-02-28 This edited book brings together research investigating foundational issues relating to the generation and restriction of alternative sets from theoretical and empirical perspectives. It includes contributions from noted scholars in the field to provide theoretical arguments, opinionated perspectives, synthesizing existing positions and empirical evidence from experimentation and fieldwork in support of a theoretical framework. Alternatives have come to occupy a central place in formal semantic theory and are referenced in notable accounts of various phenomena including focus, negation, implicature, modality, counterfactuals, and contrastive topics among others. More recently, experimental investigations have addressed the mental activation and availability of alternatives in sentence comprehension and memory representations, finding that alternative meanings are computed during incremental processing and persist in memory after sentence completion for a

limited amount of time The diverse perspectives represented in this volume will serve to clarify and guide the major avenues available in future research on the topic and the book will be of interest to graduate students and researchers in fields such as linguistics especially psycholinguistics and experimental pragmatics philosophy and cognitive science **Innovative Computing and Communications** Aboul Ella Hassanien, Sameer Anand, Ajay Jaiswal, Prabhat Kumar, 2024-09-26 This book includes high quality research papers presented at the Seventh International Conference on Innovative Computing and Communication ICICC 2024 which is held at the Shaheed Sukhdev College of Business Studies University of Delhi Delhi India on 16 17 February 2024 Introducing the innovative works of scientists professors research scholars students and industrial experts in the field of computing and communication the book promotes the transformation of fundamental research into institutional and industrialized research and the conversion of applied exploration into real time applications

Determinants of FDI in Central and Eastern Europe Hanna Makhavikova, 2018-08-17 This book provides a detailed examination of foreign direct investment FDI inflows in Central and Eastern Europe CEE after closer integration in the European Union An important facet of European economic integration was the development of a free trade area in Central and Eastern Europe which improved market accessibility However to date these relations have been little explored theoretically The book examines foreign investments in different transition countries from both a theoretical and an empirical perspective It analyzes changes in the choice of location by foreign investors in nineteen CEE countries between 1992 and 2015 and shows that it is linked to the removal of intra regional trade barriers The findings suggest that regional integration increases the incentives for multinationals to invest in the participating countries especially in those with larger markets and lower production costs *Multivariate Statistical Methods* Bryan F. J. Manly, Jorge A. Navarro Alberto, Ken

Gerow, 2024-10-04 *Multivariate Statistical Methods A Primer* offers an introduction to multivariate statistical methods in a rigorous yet intuitive way without an excess of mathematical details In this fifth edition all chapters have been revised and updated with clearer and more direct language than in previous editions and with more up to date examples exercises and references in areas as diverse as biology environmental sciences economics social medicine and politics Features A concise and accessible conceptual approach that requires minimal mathematical background Suitable for a wide range of applied statisticians and professionals from the natural and social sciences Presents all the key topics for a multivariate statistics course The R code in the appendices has been updated and there is a new appendix introducing programming basics for R The data from examples and exercises are available on a companion website This book continues to be a great starting point for readers looking to become proficient in multivariate statistical methods but who might not be deeply versed in the language of mathematics In this edition we provide readers with conceptual introductions to methods practical suggestions new references and a more extensive collection of R functions and code that will help them to deepen their toolkit of multivariate statistical methods **Breastfeeding and Human Lactation** Donna Geddes, Sharon Perrella, 2019-05-20

Human lactation has evolved to produce a milk composition that is uniquely designed for the human infant. Not only does human milk optimize infant growth and development, it also provides protection from infection and disease. More recently, the importance of human milk and breastfeeding in the programming of infant health has risen to the fore. Anchoring of infant feeding in the developmental origins of health and disease has led to a resurgence of research focused in this area. Milk composition is highly variable both between and within mothers. Indeed, the distinct maternal human milk signature, including its own microbiome, is influenced by environmental factors such as diet, health, body composition, and geographic residence. An understanding of these changes will lead to unravelling the adaptation of milk to the environment and its impact on the infant. In terms of the promotion of breastfeeding, health, economics, and epidemiology is instrumental in shaping public health policy and identifying barriers to breastfeeding. Further basic research is imperative in order to design evidence-based interventions to improve both breastfeeding duration and women's breastfeeding experience.
