**How to Repair Your Motorcycle** Charles Everitt,2007      Broadening Participation in Biological Monitoring David  
 Pilz,2006 Participatory collaborative multiparty citizen volunteer monitoring is a process that has been increasing in  
 popularity and use in both developing and industrialized societies over the last several decades It reflects the understanding  
 that natural resource decisions are more effective and less controversial when stakeholders who have an interest in the  
 results are involved in the process An adequate number of such projects have now been organized tried and evaluated such  
 that sufficient information exists to recommend a comprehensive approach to implementing such processes This handbook  
 was written for managers and scientists in the United States who are contemplating a participatory approach to monitoring  
 biological resources especially biodiversity It is designed as a how to manual with discussions of relevant topics checklists of  
 important considerations to address and resources for further information Worksheets for developing implementing and  
 evaluating a monitoring plan are posted on a companion Web site The subject matter is divided into 3 stages of a monitoring  
 project encompassing a total of 22 topical modules These modules can be used in any sequence on an ongoing basis Stages  
 and modules include 1 planning documentation goals indicators collaboration decisions context organization participants  
 communication incentives design and resources 2 implementationtraining safety fieldwork sampling data and quality and 3  
 followthroughanalysis reporting evaluation and celebrations Collaboration always involves colearning so documenting  
 choices plans and activities with the Web site worksheets is integral to the manuals effectiveness      **General Technical**
