

Your RadioShack Radio-Controlled Travel Alarm Clock combines a simple design with advanced technology. The clock automatically updates the time setting when its built-in antenna receives the 530 kHz longwave radio signal from station WWVB which broadcasts the time according to the U.S. government's atomic clock in Boulder, Colorado. The clock checks this continuous signal several times each day, giving you the most accurate time possible. The clock comes with a carrying case, which makes it perfect for travel.

The clock's other features include:

Four Time Zones — let you see the time for Pacific, Mountain, Central, or Eastern time zones.

Five Languages — let you view the day of the week in English, French, German, Italian or Spanish.

Backlight — lets you light the display for about 8 seconds so you can see the time in the dark.

Dual Display — displays the current time and date or the current time and alarm time.

Low Battery Indicator — appears when the battery is weak.

Snooze Control — temporarily silences the alarm for about 8 minutes.

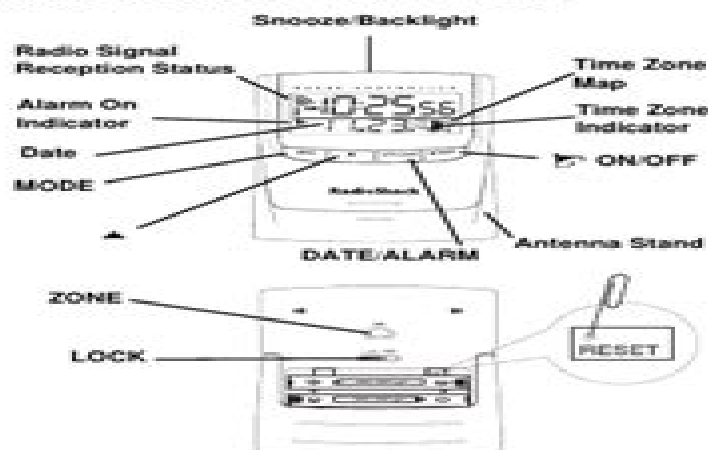

Built-In Antenna — receives periodic time updates from WWVB.

Built-In Stand — lets you place the clock on a flat surface for easy viewing.

Crescendo Alarm — gradually increases in volume to gently awaken you.

Easy-to-Use Controls — let you manually set the clock and the alarm time if you are in an area that prevents good reception of WWVB.

A QUICK LOOK AT THE CLOCK

INSTALLING BATTERIES

Your clock requires 2 AAA batteries (not supplied) for power. For the best performance and longest life, we recommend RadioShack alkaline batteries.

Cautions:

- Use only fresh batteries of the required size and recommended type.
- Do not mix old and new batteries, different types of batteries (standard, alkaline, or rechargeable), or rechargeable batteries of different capacities.

Follow these steps to install batteries.

1. Lift the antenna stand up and slide the battery compartment cover down to remove the cover.
2. Place the batteries in the compartment as indicated by the polarity symbols (+ and -) marked inside.
3. Replace the cover.

When the display flashes, the display dims, or the clock stops operating properly, replace the batteries.

Warning: Dispose of old batteries promptly and properly. Do not burn or bury them.

Caution: If you do not plan to use the clock for a week or longer, remove the batteries. Batteries can leak chemicals that can destroy electronic parts.

Notes:

- If the clock does not operate after you install the batteries, remove them and wait about five seconds until the display clears. Then reinstall the batteries.
- The clock is set to automatically search for a radio signal to set the time and date when you install the batteries. To set the clock manually, see "Manually Setting the Time, Date, and Language" on Page 2.

As soon as you install the batteries, all display segments briefly appear. Then PM 12:00, 1M, and 1D appear.

For about 2 minutes after you install the batteries, the clock scans for the radio signal while the radio indicator and the United States time zone map flash.

The clock also automatically shows a time zone. While the clock is scanning for a signal, you can set it to show your time zone. To change the time zone, repeatedly press **ZONE** until your time zone is highlighted (P = Pacific, C = Central, M = Mountain, or E = Eastern).
