

Radioactive Dating Game

A. HALF LIFE

1. Click the "Pause" button at the bottom of the window.
2. Click the "Add 10" button below the "Bucket o' Atoms" repeatedly, until there are no more atoms left in the bucket.
3. There are now 100 carbon-14 atoms on the screen. The half-life of carbon-14 is about 5700 years. If you left those 100 carbon-14 atoms to sit around for 5700 years, how many would you expect to decay during that time? _____
4. Click the "Play" button at the bottom of the window. Watch the graph at the top of the window carefully. Was your prediction from #3 correct? _____ Was it close? _____
5. Click "Reset All Nuclei" and then repeat step #4. Was your prediction from #3 correct this time? _____ Was it close? _____
6. Is radioactive decay an easily predictable process or a statistical process? _____

B. DECAY RATES

1. Click the "Decay Rates" tab at the top of the screen.
2. On the right side of the screen, click the button next to Uranium-238. This time we will watch the decay of this atom. Uranium-238 has a half-life of about 4.5 billion years.
3. On the bucket of atoms, there is a slider. Drag the slider all the way to the right and watch the graph at the bottom of the screen.
4. Fill in the answers in this table:

After one half-life (4.5 billion years), what percent of the original uranium remains?
After two half-lives (9 billion years), what percent of the original uranium remains?
After three half-lives (13.5 billion years), what percent of the original uranium remains?
After four half-lives (18 billion years), what percent of the original uranium would remain?
5. Suppose you found a rock, and through testing found out that it had just as much lead-206 as uranium-238 in it. How old would you conclude the rock to be? _____

C. MEASUREMENT

1. Click the "Measurement" tab at the top of the screen.
2. Click "Plant Tree" at the bottom of the screen. The tree will grow and live for about 1200 years, then die and begin to decay. Let the time run and watch the graph at the top of the screen.
3. According to the graph, what is the percent of C-14 in the tree while it is alive? _____ Why? _____
4. According to the graph, approximately how many years has the tree been dead when its C-14 percent is down to 50%? _____
5. According to the graph, approximately how many years has the tree been dead when its C-14 percent is down to about 12.5%? _____
6. Click "Rock" on the right side of the screen. Click "Uranium-238" underneath "Probe Type" in the upper left of the screen. To measure longer times, we need to use an element that decays more slowly than C-14.
7. Before you click anything, make some predictions. How much uranium will be remaining when the rock is 4.5 billion years old? _____ How much will be remaining when the rock is 9 billion years old? _____ How much will be remaining when the rock is 13.5 billion years old? _____
8. Click "Erupt Volcano" to begin the process of creating an igneous rock. Watch the graph at the top of the screen. Check your predictions from #7. Were they correct? _____

Cooperative Learning in Higher Education Barbara Millis, 2023-07-03 Research has identified cooperative learning as one of the ten High Impact Practices that improve student learning. If you've been interested in cooperative learning but wondered how it would work in your discipline, this book provides the necessary theory and a wide range of concrete examples. Experienced users of cooperative learning demonstrate how they use it in settings as varied as a developmental mathematics course at a community college and graduate courses in history and the sciences, and how it works in small and large classes as well as in hybrid and online environments. The authors describe the application of cooperative learning in biology, economics, educational psychology, financial accounting, general chemistry, and literature at remedial, introductory, and graduate levels. The chapters showcase cooperative learning in action at the same time introducing the reader to major principles such as individual accountability, positive interdependence, heterogeneous teams, group processing, and social or leadership skills. The authors build upon and cross-reference each other's chapters describing particular methods and activities in detail. They explain how and why they may differ about specific practices while exemplifying reflective approaches to teaching that never fail to address important assessment issues. **Te HS&T J** Holt, Rinehart & Winston, Holt, Rinehart and Winston Staff, 2004-02 *Prentice Hall Science Explorer* Michael J.
