Globalization and Digitalization a business revolution unfolding in real time Global Meets Digital captures the many nuances of this revolution succinctly including its impact on our lives and business An immediate implication of this revolution is that the economic principles that underpinned business and strategy for hundreds of years such as diminishing returns to scale

and resource scarcity are no longer valid for a large and growing number of products and services. The book will challenge you to think differently not just about digital products but also about physical products. In the global digital world products are of three kinds: physical, digital, and smart machines (products that are both physical and digital and connected to the internet), a distinction missed by most books on strategy and global business. The economics of each kind of products is distinct from that of the others, which has strategic implications for all kinds of businesses, implications such as how to compete and how to create and capture value. With several mini case studies and over 100 company examples, the book covers themes and cutting edge issues like the paradox of globalization, digital disruption, disruptive business models, exponential technologies, Internet of Things, competition in digital markets, winner take all market dynamics, Industry 4.0, how to innovate, strategizing for the New Normal, and value creation and value capture in both B2C and B2B contexts. The book derives its underpinnings from the practice of global and digital business, while theory remains in the background. Intended specifically for an executive professional audience, *Global Meets Digital* should also be of value to business students and professors learning to dip their toes into a digital world.

Vinod Jain is an expert in global and digital strategy, award winning professor, Fulbright Scholar, and author of an MBA textbook, *Global Strategy*.
