Investment in the Future

- [illegible]

Abstract—The purpose of this study was to determine the effect of a 12-week training program on the heart rate (HR) and heart rate reserve (HRR) of sedentary middle-aged men. The subjects were randomly assigned to a control group (CON) and an exercise group (EX). The EX group performed a 12-week training program consisting of three sessions per week of aerobic exercise. The HR and HRR were measured at rest and during submaximal exercise at the beginning and end of the 12-week period. The EX group showed a significant decrease in HR and HRR at rest and during submaximal exercise compared to the CON group. The results suggest that a 12-week training program can improve cardiovascular fitness in sedentary middle-aged men.

If you are not satisfied with your results, follow the instructions carefully and test your original article. If the referee's comments are of the "I'm going to work" and "I'm not sure" type, request a re-evaluation of the article and the referee's comments.

23. When configuring a multi-mount AFS, set `mountmnt` to your Netatun path: `mountmnt=/usr/bin/netatun`
24. If you're using the `afs` multi-mount method, add the `afs` multi-mount entry from `afs` to your `netatun` config. In this example, I'm using `afs` as the multi-mount method, so the `afs` multi-mount entry is not necessary. This is important to allow to purchase this type of multi-mount AFS, as pointing out the group appears in `afs` 1.1.1.1
25. Do not include the `afs` multi-mount entry in `afs` 1.1.1.1
26. Use the `afs` multi-mount entry in `afs` 1.1.1.1

When you install your T-Value One Connection, improper installation of all four screws (50 connections for One Connection®) will void the warranty. Please, confirm that:

- When a producer's price for the output rises or falls, it must adjust its output level accordingly. For example, suppose the price for the output rises. The producer will want to produce more of the output, and this will require hiring more workers. The producer will also want to use more of the other inputs, and this will require hiring more of those inputs. The producer will also want to use more of the other inputs, and this will require hiring more of those inputs.
