

Charging the battery

Use the charger to charge the battery before using it for the first time. A computer can be also used to charge the device by connecting them via the USB cable.

Use only Samsung-approved chargers, batteries, and cables. Unapproved chargers or cables can cause the battery to explode or damage the device.

- When the battery power is low, the device emits a warning tone and displays a low battery power message.
- If the battery is completely discharged, the device cannot be turned on immediately when the charger is connected. Allow a depleted battery to charge for a few minutes before turning on the device.
- If you use multiple applications at once, network applications, or applications that need a connection to another device, the battery will drain quickly. To avoid disconnecting from the network or losing power during a data transfer, always use these applications after fully charging the battery.

Charging with the charger

Connect the USB cable to the USB power adaptor and then plug the end of the USB cable into the multipurpose jack.

Connecting the charger improperly may cause serious damage to the device. Any damage caused by misuse is not covered by the warranty.

Distracted Robert Rosenberger, 2024-06-25 Applying insights from philosophy and cognitive science to address the

urgent issue of smartphone induced distracted driving Although the dangers of texting while driving are widely known many people resist the idea that phone usage will impair their driving And connectivity features in new cars have only made using technology behind the wheel more tempting What will it take to change people s minds and behavior Robert Rosenberger contends that a better understanding of why this combination of technologies is so dangerous could effectively adjust both habits and laws Rosenberger brings together ideas from philosophy and cognitive science to leverage a postphenomenological perspective that reveals how our smartphones make us such bad drivers Reviewing decades of empirical studies in cognitive science he shows that we have developed habits of perception regarding our compulsive technology use habits that may wrest our attention away from the road Distracted develops innovative concepts for understanding technology related habits and the ways that our relationships to our devices influence how we perceive the world In turn these ideas can help drivers be more cognizant of the effect that smartphone usage has on their perceptions better inform efforts to enact stricter regulations and help us all to be more reflective about the technologies that shape our lives
