Multimedia Information Extraction Mark T. Maybury, 2012-07-11 The advent of increasingly large consumer collections of audio e g iTunes imagery e g Flickr and video e g YouTube is driving a need not only for multimedia retrieval but also information extraction from and across media Furthermore industrial and government collections fuel requirements for stock media access media preservation broadcast news retrieval identity management and video surveillance While significant advances have been made in language processing for information extraction from unstructured multilingual text and extraction of objects from imagery and video these advances have been explored in largely independent research communities who have addressed extracting information from single media e g text imagery audio And yet users need to search for concepts across individual media author multimedia artifacts and perform multimedia analysis in many domains This collection is intended to serve several purposes including reporting the current state of the art stimulating novel research and encouraging cross fertilization of distinct research disciplines The collection and integration of a common base of intellectual material will provide an invaluable service from which to teach a future generation of cross disciplinary media scientists and engineers

Exploring the Mathematical Education of Teachers Using TEDS-M Data Maria Teresa Tatto, Michael C. Rodriguez, Wendy M. Smith, Mark D. Reckase, Kiril Bankov, 2018-08-16 This book uses the publicly available TEDS M data to answer such questions as How does teacher education contribute to the learning outcomes of future teachers Are there programs that are more successful than others in helping teachers learn to teach mathematics How does the local and national policy environment contribute to teacher education outcomes It invites readers to explore these questions across a large number of international settings The importance of preparing future mathematics teachers has become a priority across many nations Across the globe nations have allocated resources and expertise to this endeavour Yet in spite of the importance accorded to teacher education not much is known about different approaches to preparing knowledgeable teachers and whether these approaches do in fact achieve their purpose The Mathematics Teacher Education and Development Study TEDS M is the first and to date the only cross national study using scientific and representative samples to provide empirical data on the knowledge that future mathematics teachers of primary and secondary school

acquire in their teacher education programs The study addresses the central importance of teacher knowledge in learning to teach mathematics by examining variation in the nature and influence of teacher education programs within and across countries The study collected data on teacher education programs structure curriculum and opportunities to learn on teacher educators characteristics and beliefs and on future mathematics teachers individual characteristics beliefs and mathematics and pedagogical knowledge across 17 countries providing a unique opportunity to explore enduring questions in the field

Handbook of Medical Neuropsychology Carol L. Armstrong, Lisa Morrow, 2010-08-09 This handbook celebrates the abundantly productive interaction of neuropsychology and medicine This interaction can be found in both clinical settings and research laboratories often between research teams and clinical practitioners It accounts for the rapidity with which awareness and understanding of the neuropsychological components of many common medical disorders have recently advanced The introduction of neuropsychology into practice and research involving conditions without obvious neurological components follows older and eminently successful models of integrated care and treatment of the classical brain disorders In the last 50 years with the growing understanding of neurological disorders neuropsychologists and medical specialists in clinics at bedside and in laboratories together have contributed to important clinical and scientific advances in the understanding of the common pathological conditions of the brain stroke trauma epilepsy certain movement disorders tumor toxic conditions mostly alcohol related and degenerative brain diseases It is not surprising that these seven pathological conditions were the first to receive attention from neuropsychologists as their behavioral symptoms can be both prominent and debilitating often with serious social and economic consequences

Plant Diversity Patterns and Drivers Qing Zhang,Gang Feng ,Jinliang Liu,2024-09-20 Biodiversity can provide a series of important ecosystem functions and ecosystem services

which meet the needs of human beings Plants are the biological group with the highest carbon content on earth their diversity has attracted increased attention The interpretation of plant diversity patterns and drivers is crucial for the conservation and utilization of plant resources and is also one of the hot topics in plant science and ecology There are already many studies on the patterns and drivers of plant diversity including different diversity dimensions e g taxonomic phylogenetic and functional diversity and spatial scales different plots sites watershed country continent and globe The mechanisms underlying plant diversity patterns are also quite complex For example many hypotheses are related to contemporary climate and soil conditions with temperature precipitation and soil nutrient being the most discussed drivers In addition paleoclimate and geological events may also have a strong legacy on current plant diversity patterns Except for these natural factors many anthropogenic activities including agriculture deforestation grazing urbanization and coal mining are also important drivers of plant diversity These anthropogenic activities can affect plant diversity patterns not only directly but also indirectly through their effects on habitat loss and habitat fragmentation Therefore the current plant diversity patterns are the result of many interacting factors and need to be interpreted from a more comprehensive perspective This Research Topic will therefore provide a platform for sufficient communication aiming to integrate the research from different fields and deepen the understanding of the patterns and drivers of plant diversity We encourage the submission of theoretical and experimental studies on different plant groups such as seed plants ferns mosses and algae Studies based on new methods and technology such as genomics and drones are also welcomed We welcome the following specific topics Effects of historical factors such as paleoclimate geological events on plant diversity Plant diversity that driven by contemporary climate and anthropogenic activities The effect of habitat loss and fragmentation on plant diversity New methods of research on the patterns and drivers of plant diversity
