

Unit 1  
MODULE

**3**

**HEAT AND TEMPERATURE**

In Grade 7, students learned about the conditions necessary for heat transfer to occur and the ways by which *heat* transfers from one place to another. This time, they will explore what happens to the object when *heat* is transferred to or from it. They will also learn about the factors that affect the amount of *heat* that an object can transfer. Students are also expected to understand the difference between *heat* and *temperature*. Furthermore, this module hopes to address the following misconceptions on *heat* and *temperature*:

1. *Heat* is a substance.
2. *Heat* is not energy.
3. *Heat* and *temperature* are one and the same.
4. The *temperature* of an object depends on its size or volume.
5. The amount of *heat* transferred is determined always by the change in *temperature*.

**Key questions for this module**

What happens to solids, liquids, or gases when they absorb or release *heat*?

Does *heat* affect all kinds of materials in the same way?

Are *heat* and *temperature* one and the same?

**Notes:**

- This module is good for 6 days. The experiments were made simple so that students will be able to finish them early and the discussion of the results can be done also on the same day.
