In all, about 1,000 dragonfly species have been identified. They are found in all parts of the world. Dragonflies are very common in warm, wet areas. They are also found in some of the most remote and isolated places on Earth. Dragonflies are very important to the environment. They are one of the few insects that can fly in all directions. They are also one of the few insects that can fly at high speeds. Dragonflies are very beautiful and they are also very useful. They are one of the few insects that can fly in all directions.
