Text Philosophy Of Science For Bsc:

Estonian Studies in the History and Philosophy of Science Rein Vihalemm, 2012-12-06 The development of geography also forms an interesting chapter in the history of the University of Tartu and in that of Estonian science in general On the one hand geography is a natural science in the broader sense of the word on the other hand it is a study of human activity This status of geography makes it particularly sensitive to the cultural and political circumstances under which scholarship and science have developed in Estonia The article by Professor of Human Geography Ott Kurs born 1939 and historian of science PhD in geography Erki Tamrniksaar born 1969 In Political Draughts Between Science and the Humanities Geography at the University of Tartu Between the 17 20 Centuries is devoted to this topic Among other things the article states that regular instruction in geography started at the University of Tartu in 1826 when the second chair of geography in Europe was established here Although the present book does not contain any studies on philosophy at Tartu University in the 19 century I would still like to mention two names In the early 19 century I Kant's philosophy was dominant at Tartu University One of Kant's pupils Gottlob Benjamin Jasche 1762 1839 who had worked under him as a Privatdozent in Königsberg served as a professor here from 1802 1839 In the history of philosophy he is primarily known as the publisher of Kant's *Logic*
